

Smith & Wesson 1984

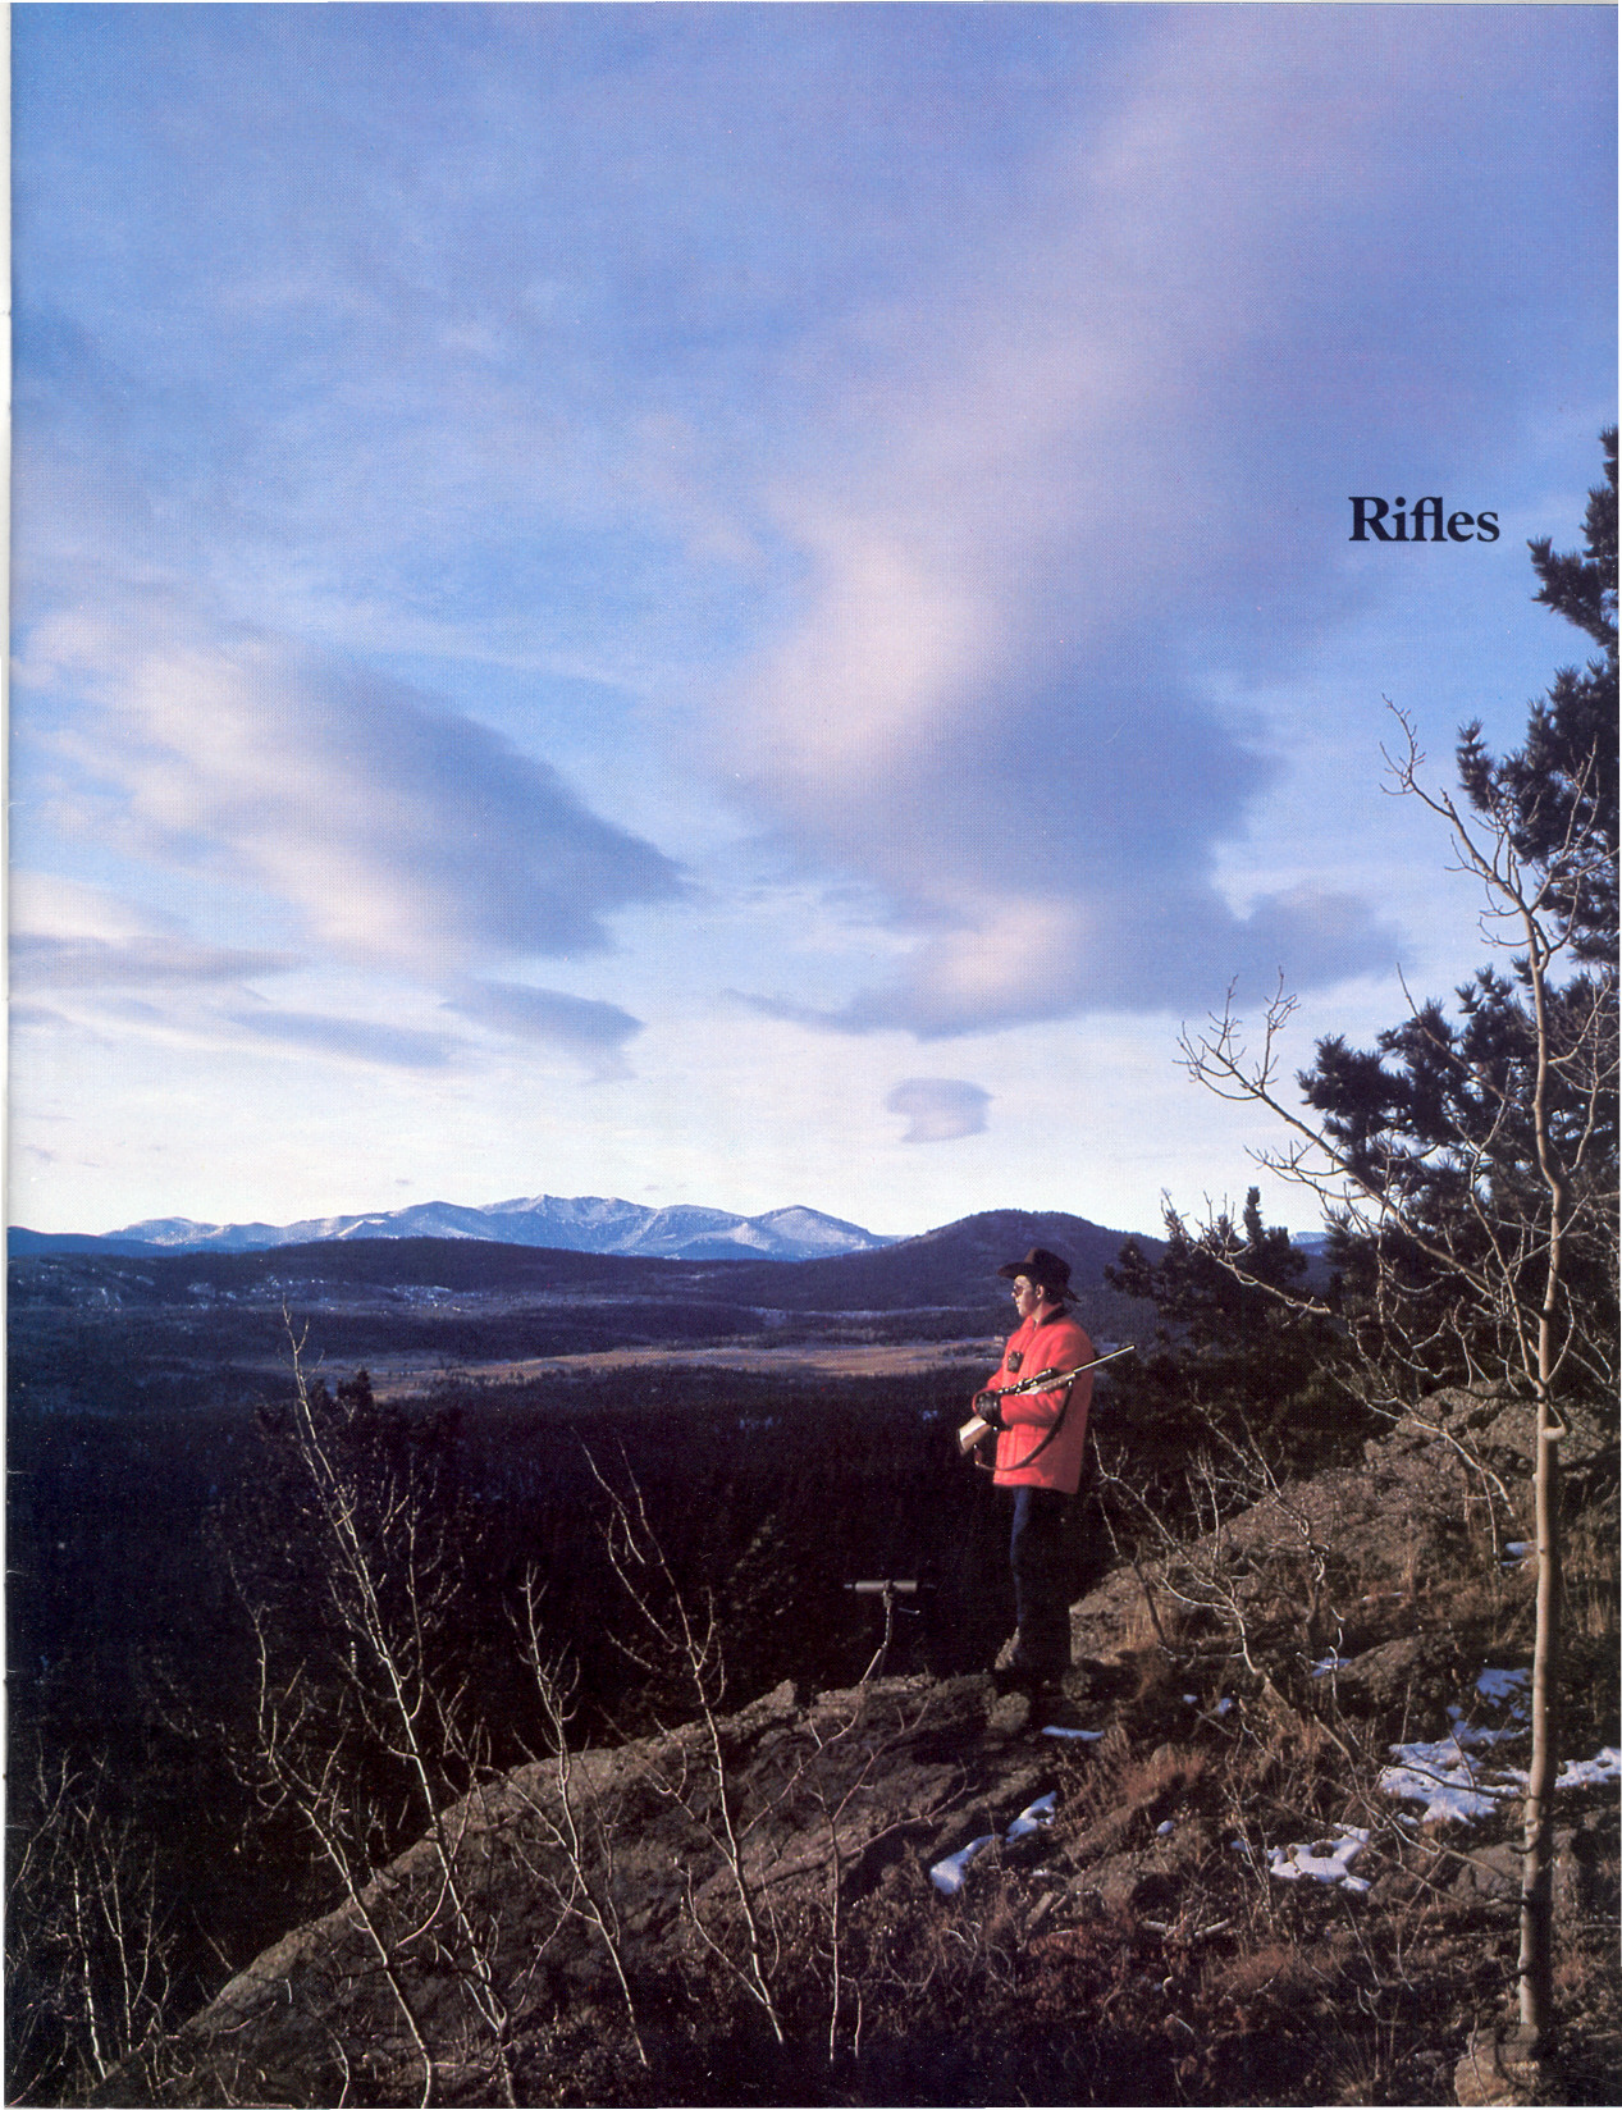

Remember unwrapping your first .22? The very first time your Dad said, "Come on, son, let's do a little bird shooting this evening."? Or the day your wife broke her first clay target?

Sure you do!

These are the kind of memories that live forever. Memories of wholesome, family fun. Of strengthened family ties. Lasting friendships.

This book is dedicated to those memories. Just as our commitment to providing fine products for the shooting sports is dedicated to helping create lasting memories for this and many more generations of American sportsmen and women.

Rifles

It's a crisp 20° in the Rockies. The first rays of the morning sun are just touching the snow clad mountain tops. You're on your first elk hunt. And the feeling is pure exhalation.

You get the same feeling when you first pick up a fine rifle. It's more than just the feeling of wood and steel. It's a feeling of natural balance. An easy, positive pointability. Comfort.

It's a feeling that this particular rifle will be a dependable companion you can count on. Hunt after hunt. Year after year.

You'll experience that feeling when you shoulder a Smith & Wesson. Wood and metal blend

together in a functional expression of traditional rifle quality and styling.

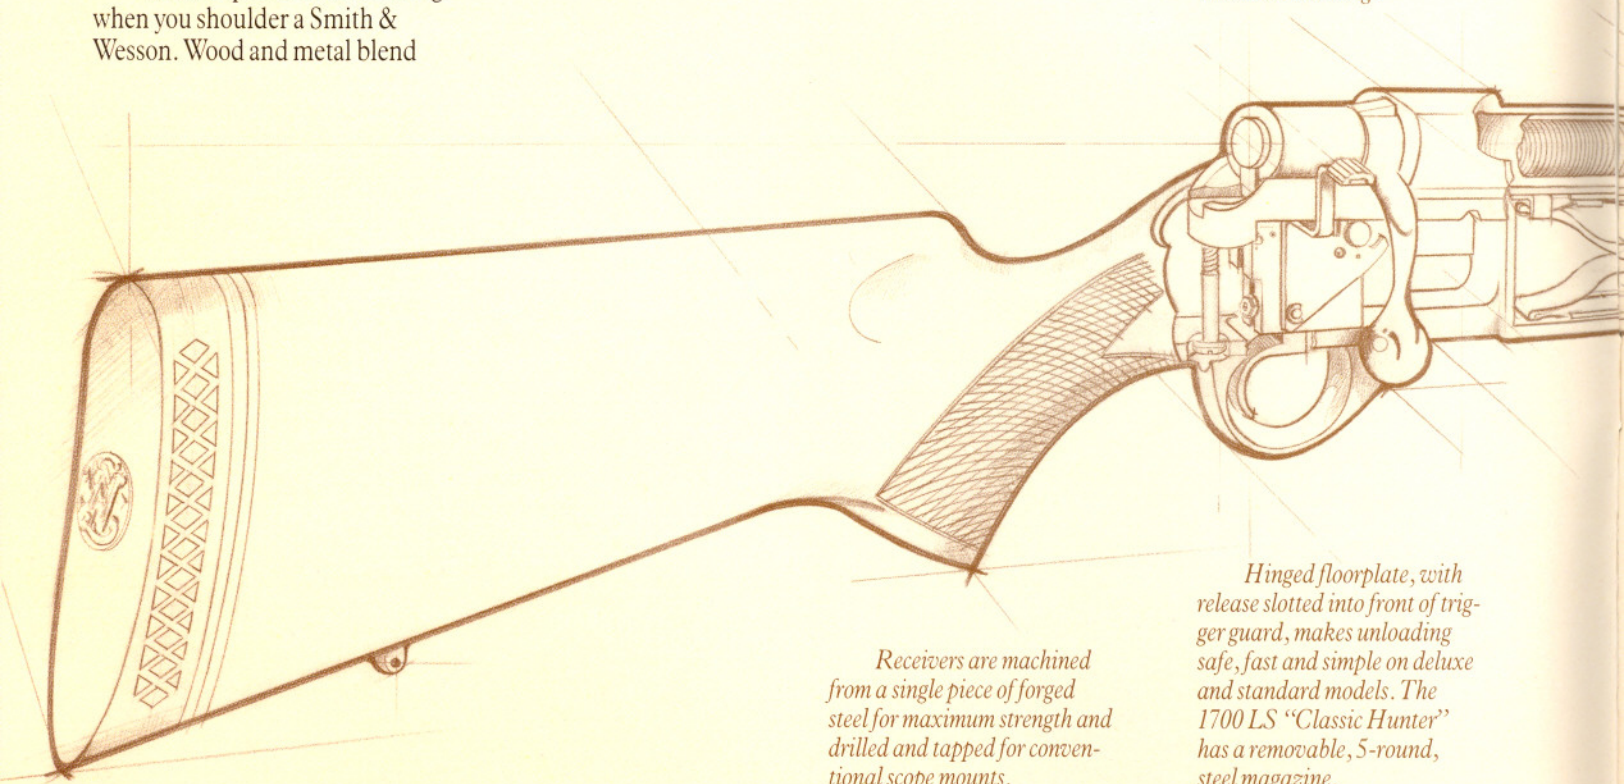

The design and performance characteristics preferred by the most demanding and experienced shooters are integrated in these straight shooting rifles of highest quality material and workmanship.

The lustrous blue metal finish and the hand-rubbed smoothness of select American walnut give Model 1500 rifles the look and feeling of far more expensive guns.

S&W's brilliant, durable finish protects and maintains the stability of the wood through seasons of changing weather.

And close inspection will show these fine rifles are built to the exacting specifications and quality standards that promise the many years of performance and accuracy expected of a Smith & Wesson.

Conveniently located thumb safety securely locks trigger, yet allows bolt to be opened for quick, safe inspection and unloading.

Receivers are machined from a single piece of forged steel for maximum strength and drilled and tapped for conventional scope mounts.

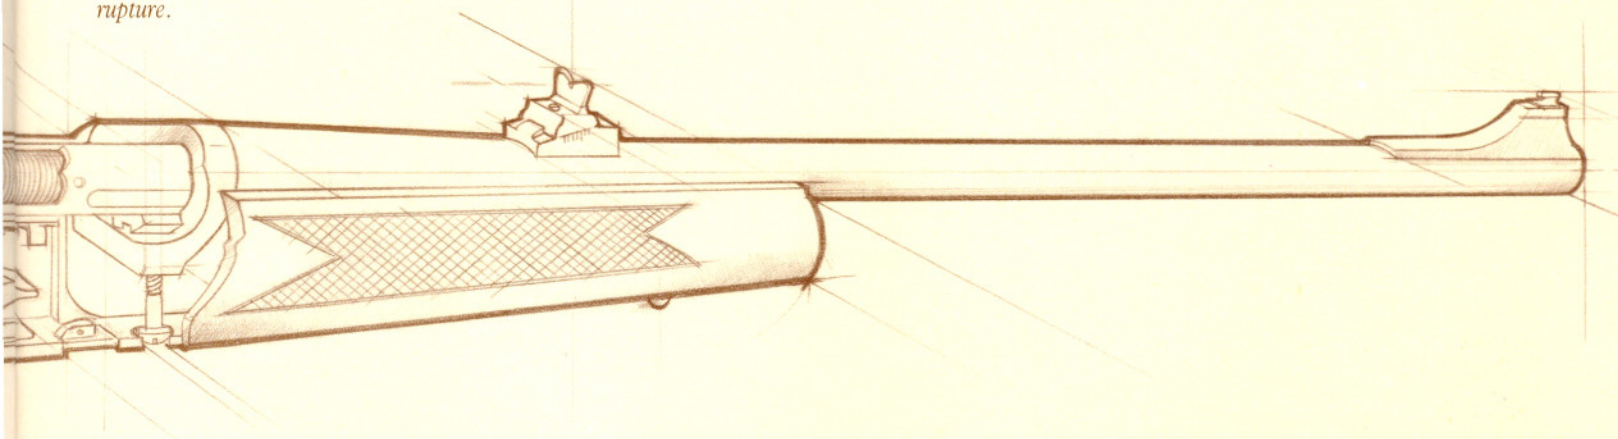

Hinged floorplate, with release slotted into front of trigger guard, makes unloading safe, fast and simple on deluxe and standard models. The 1700 LS "Classic Hunter" has a removable, 5-round, steel magazine.

Firing pin and spring can be removed from bolt body without tools for easy inspection.

Bolt body has three relief ports to allow gas to escape down through magazine in the unlikely event of a cartridge rupture.

Careful inletting of the stock provides precision bedding of receiver and barrel for consistent accuracy.

Twin locking lugs ride in three-rail design for smooth, easy, non-binding bolt operation and travel.

NEW

Model 1700LS Classic Hunter.

Here's our answer to your requests for a lightweight version of the proven S&W bolt-action rifle. In .243 Win., the Classic Hunter, with its gracefully

tapered Schnable type fore-end, 18 line hand checkering and low gloss, satin finish, weighs in at just 6 lbs., 15 oz.

Model 1500 Mountaineer.

Many have asked us to offer the popular 1500 standard without sights, ready for mounting your favorite scope. The Moun-

taineer is the gun you've been waiting for. Complete specifications on both these new guns will be found overleaf.

Bolt Action Rifle Features and Specifications

Action.

All models. Repeating bolt action. Two action lengths.

Stock & Fore-end.

All models. Select American walnut. Ventilated rubber recoil pad on Magnum models. Non-slip hard butt plate on other calibers.

Model 1500 Mountaineer. Satin finish, eighteen line hand checkering. Swivel posts. White line spacer.

Model 1600 Deluxe and Deluxe H.B. Varmint. Monte Carlo comb and cheek piece. Skip-line hand checkering. Pistol grip cap with inlaid S&W seal. Swivel posts and quick detachable swivels. White line spacer. S&W hard, durable, high luster protective finish.

Model 1700 LS Classic Hunter.

Tapered Schnable fore-end. Eighteen line hand checkering. Black line spacer, rubber rifle pad and pistol grip cap. Flush mounted, removable rotating swivels. Low gloss, satin finish.

Receiver.

All models. Machined from single block of steel. Drilled and tapped for conventional scope mounts.

Model 1500 Mountaineer and Model 1600 Deluxe. Hinged steel floorplate with release on outside of trigger guard.

Model 1700 LS Classic Hunter. Removable, 5-round steel magazine with floorplate.

Barrel.

All models. Proof-tested, cold hammer forged steel.

Sights.

Model 1500 Mountaineer. Hooded ramp front sight with gold bead. Fully adjustable rear sight. Both removable.

Safety.

All models. Positive, non-slip thumb type on right side. Locks trigger but permits bolt to be opened for safe inspection and unloading.

Bolt.

All models. Machined steel. Twin locking lugs ride in three rail design. Three relief ports in bolt body. Firing pin and spring removable without tools for inspection.

Model 1600 Deluxe and Model 1700 LS. Jeweled bolt body.

Model 1700 LS knurled knob.

**Auto Loading
Shotguns**

The young boy sets the decoys as the man paddles. Then they settle. Quiet. Still. Waiting for those ducks to come in. Even though the words are whispered and few, they've never been closer, father and son. Sharing an experience both will always remember.

You felt the same way when you took your first shotgun out of the box. Remember the thrill? Your eyes feasted on the deep, rich blue finish of the barrel and receiver. Your hands grasped the beautifully finished stock and

fore-end. And that gun swung to your shoulder as naturally as if it were a part of your body.

The Smith & Wesson Model 1000 gas autoloader has been designed and crafted to recapture that special feeling.

The first time you swing a Model 1000 to your shoulder you'll feel the superb balance, the responsiveness of this extraordinary shotgun.

Wood flows into metal. Double sighting beads lead your eyes to the target. Take in the details of

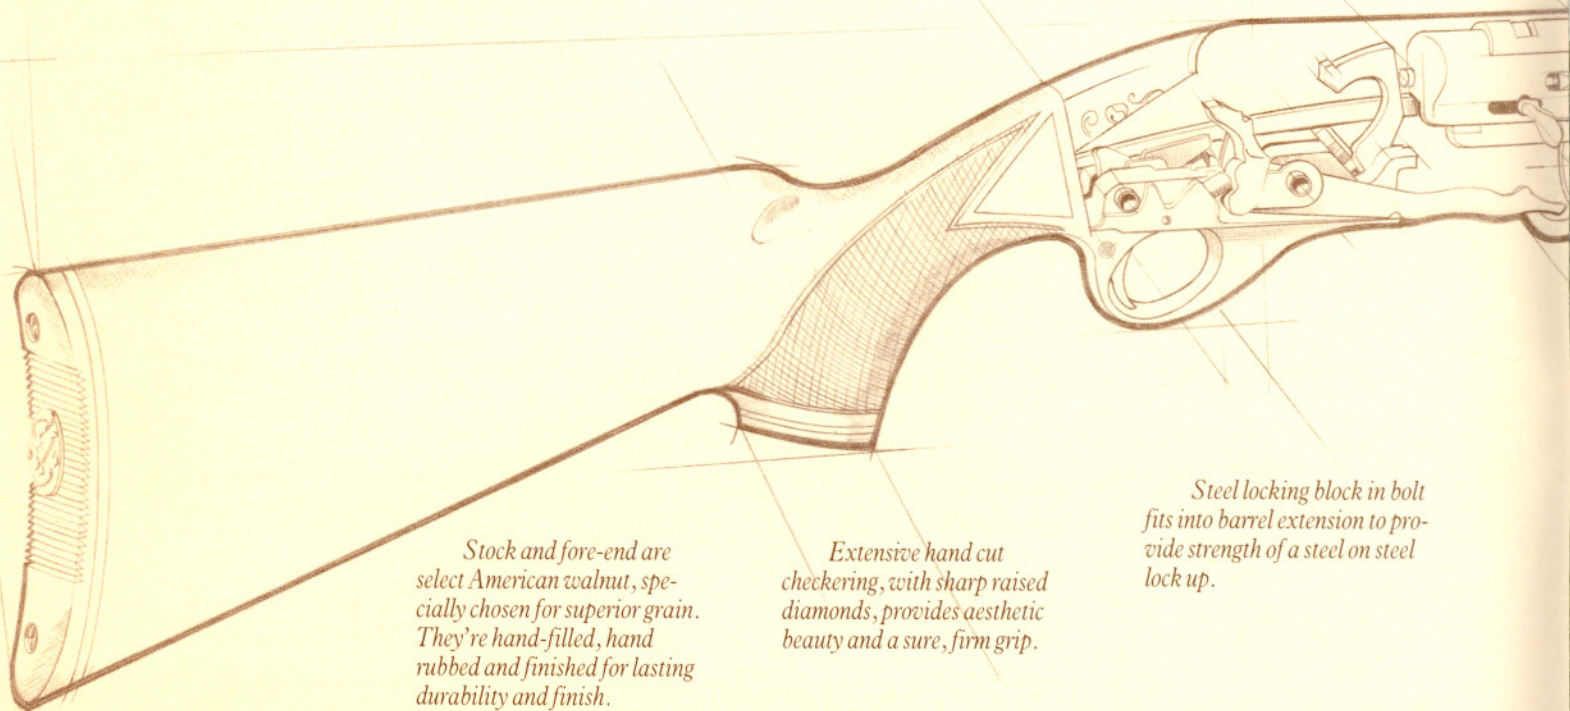

this shotgun that is made without compromise.

The quality of the Model 1000 is evident in every detail. The high luster blue finish. The smooth flowing, matte finish, cross-hatched steel vent rib. The handsome scroll etching on both sides of the receiver. The broad, comfort contoured hard chromed trigger. The right or left hand cross bolt safety.

Stock and fore-end of the Model 1000 are crafted from select American walnut, specially

chosen for superior grain. They're hand filled, hand rubbed and finished for lasting durability and beauty. And then extensive hand cut checkering, with sharp raised diamonds, provides the rare combination of aesthetic beauty with the functional demand for a sure, firm grip.

In quality, performance and value, the Model 1000 is a shotgun that will give you the pride of owning something extraordinary. Today. And for many tomorrows.

S&W's multi-choke system is available on the Model 1000 to give you three fine shotguns in one. You simply remove one choke tube and screw in another to get the pattern that's right for the situation.

Each Model 1000 with the special Multi-choke barrel comes with three interchangeable Multi-choke tubes.

1. The Multi-choke Improved Cylinder tube provides an effective open pattern for close-in game birds like grouse, quail and dove.

2. The Multi-choke Modified tube develops a tighter pattern for medium range hunting such as rabbit, squirrel and pheasant.

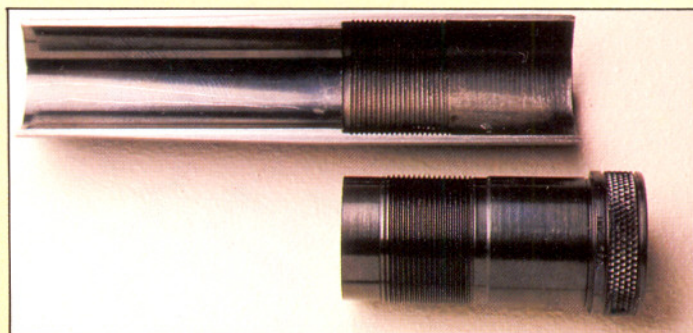

3. The Multi-choke full tube delivers a tight, high-density pattern for longer range shooting of ducks and geese.

The Smith & Wesson Multi-choke System is unique in that it maintains virtually the same balance, swing and weight as guns without the choke system. It's all in the way the barrel is formed. Take a look at the inset photograph.

Instead of increasing the

wall thickness of the barrel for its whole length (which tends to make the gun muzzle heavy), Smith & Wesson only increases wall thickness at the end of the

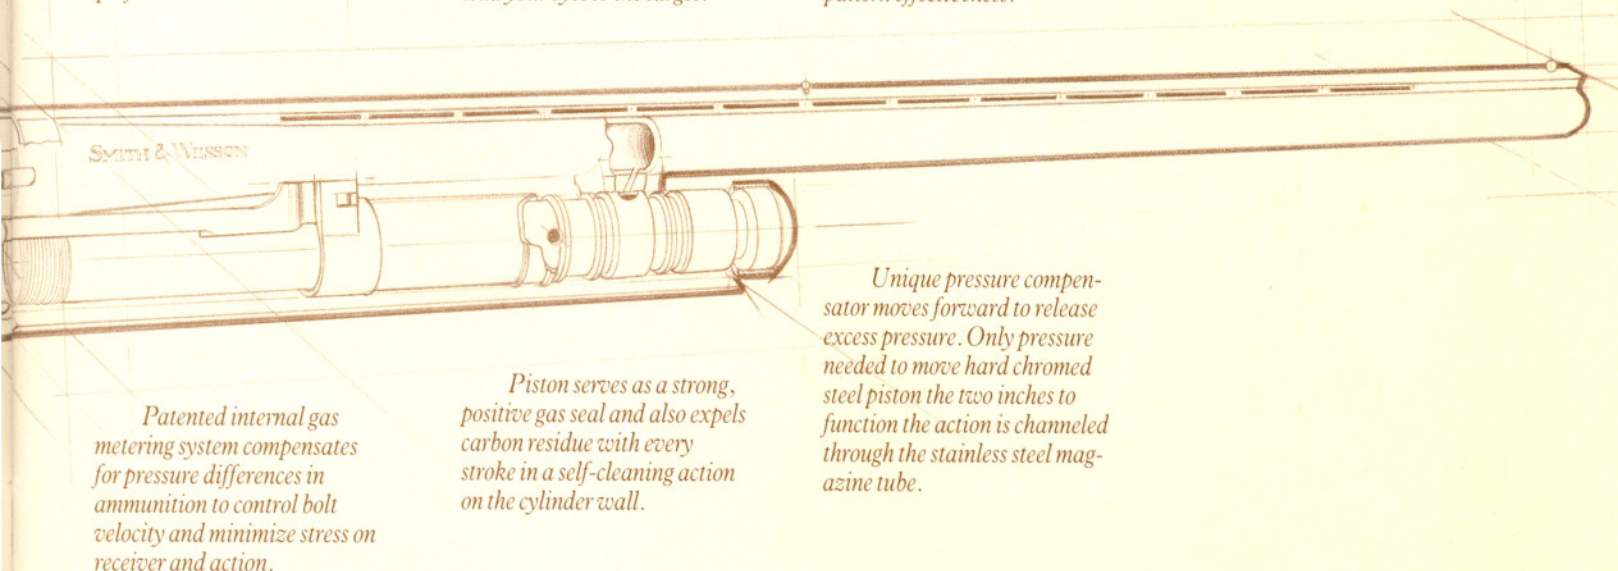

barrel to accommodate the tube. There's an almost imperceptible step down to the tube, too, to prevent residue build-up and possible malfunctions.

Bolt and bolt carrier are hard chromed steel to resist wear and corrosion, provide consistent, like-new performance.

Double sighting beads on the smooth flowing, matte finish, cross-hatched steel vent rib lead your eyes to the target.

Barrel is premium quality molybdenum steel, cold hammer forged to length and shape, then precisely reamed to gauge, polished to near perfect smoothness and choked with exacting skill for maximum pattern effectiveness.

New Model 1000 Super 12 Multi-Choke

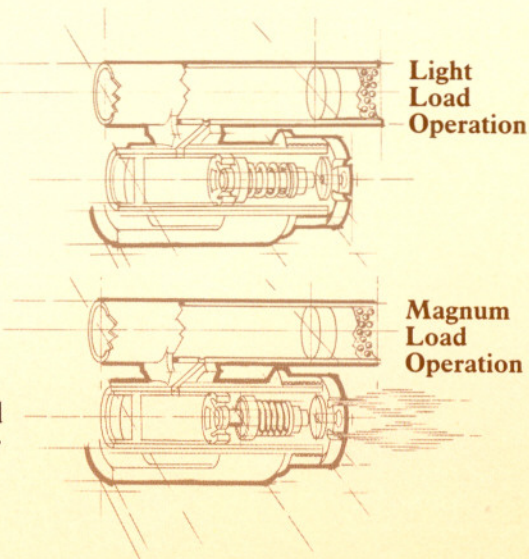

... the one gun that handles every hunting load

Here's the first shotgun that will shoot all 12-gauge hunting loads. And that means *all*—from the heaviest 3-inch Magnum to 1 $\frac{1}{8}$ ounce, 2 $\frac{3}{4}$ -inch field loads. Without changing barrels, pushing buttons or flipping levers. You simply load and shoot.

An all new, S&W designed metering system controls gas flow. The action of the Super 12 actually cycles faster than usual with light

field loads, yet slower than usual with Magnums. And that means less stress on the receiver and on your shoulder!

Combine this unique new design with S&W's Multi-Choke system and you've got a proven performer that will handle every hunting situation from doves to ducks. Add a 3-inch chambered, 22" slug barrel with rifle sights and you've got a deer gun that will hold four 3-inch Magnum buck loads or 2 $\frac{3}{4}$ " slugs.

Autoloading Shotgun Features & Specifications

MODEL 1000 AUTOLOADING SHOTGUNS

Style.

Gas-operated low-recoil autoloading shotgun.

Gauges.

12 gauge 2 $\frac{3}{4}$ " and 3" Magnum, 20 gauge 2 $\frac{3}{4}$ " and 3" Magnum.

Barrel.

Smith & Wesson proof-tested chrome molybdenum steel. Extra barrels interchangeable without fitting.

Receiver.

Lightweight, high tensile strength aluminum alloy, scroll engraved both sides. Super 12 and 3" Magnum have steel receiver.

Safety.

Positive crossbolt type, interchangeable left or right hand.

Sights.

Two metal beads on vent rib. 22" cylinder bore barrel has rifle sights.

Stock & Fore-end.

Select American walnut. Rubber recoil pad on Magnum models and slug guns.

Standard Stock Dimensions.

Length of pull 14", drop at comb 1 $\frac{1}{2}$ ", drop at heel 2 $\frac{3}{8}$ ".

Length. 48" overall with 28" barrel.

Approx. Weight. 7 $\frac{1}{2}$ lbs. with 28" barrel (12 gauge, 2 $\frac{3}{4}$ " chamber); 8 lbs. with 30" barrel (12 gauge, 3" chamber); 6 $\frac{1}{2}$ lbs. with 28" barrel (20 gauge, 2 $\frac{3}{4}$ " chamber); 7 lbs. with 28" barrel (20 gauge, 3" chamber); 8 lbs. with 30" barrel (Super 12).

Pump Shotguns

"Why don't you bring Cathy and the kids down for the weekend?" A call from Dad who wanted to see his grandchildren. And get in some quail shooting. That special feeling of closeness comes flooding back as you work his favorite milo field together again.

It brings back the feeling you had when Dad gave you your first pump. Maybe that's why a pump action shotgun is still your favorite.

But you'll agree that a new dimension has been added when you pick up a Model 3000 pump. First thing you'll notice is the perfect partnership of weight and balance. It feels right. Swings easily. And points naturally.

Try the action. Dual action bars provide fast, straight-line pumping. Smooth feeding. Positive ejection.

If, while a shell is in the chamber, a second shell slips past the shell stop and lodges between the bolt and the lifter, you simply fire the round in the chamber, function the action and the jam is cleared. You don't have to knock out the pins and take the gun apart if your gun is an S&W.

Run your hands over this masterpiece. Feel the warmth of the richly grained American wal-

nut. See how perfectly the wood mates with the deep blue receiver and barrel. Feel the sure-grip security of the deep hand checkering.

Behind the superb lines, functional beauty and natural feel of the Model 3000 pump is solid design and manufacturing engineering.

Some gun, this Model 3000 pump. Designed and built with pride to exacting quality stand-

ards to help the value conscious shooter enjoy year after year of dependable performance. The distinctive Smith & Wesson seal set into the pistol grip cap is our way of saying we're proud of the quality, performance and value we've built into the Model 3000 pump.

Rubber recoil pad is standard.

Receiver is machined from solid steel.

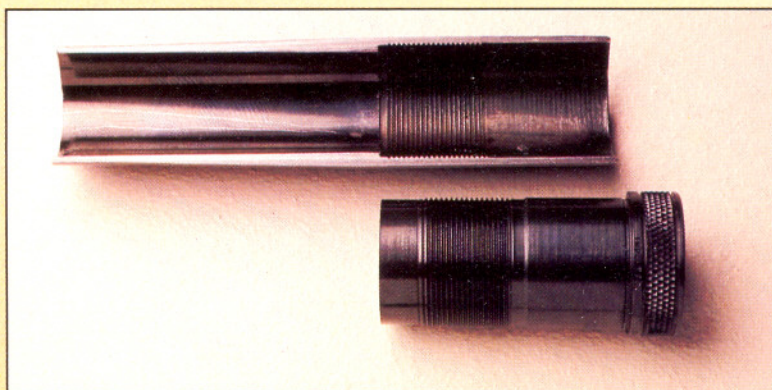

Bolt is chromed and polished to resist corrosion and provide years of like-new performance.

Cross-bolt safety is reversible for left or right hand.

Extensive hand checkering adds to the beauty of the pistol grip and fore-end.

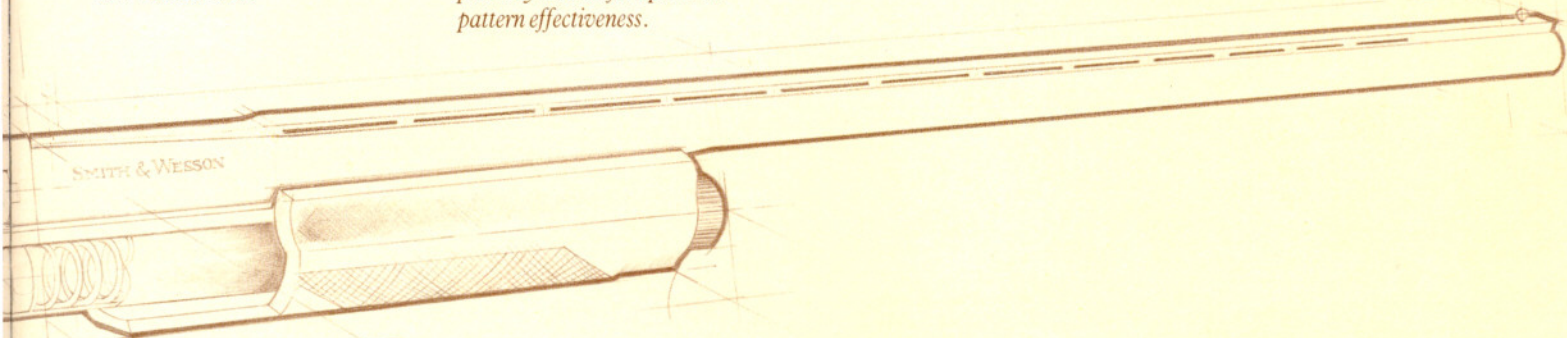

Operating elements in the bolt have been designed to enhance positive shell extraction and smooth feeding.

Dependable Model 3000 pump shotguns are offered with the Multi-choke interchangeable choke system. As with the Model 1000 Multi-choke, the pump version comes with Improved Cylinder, Modified and Full choke tubes to give you the pattern you need when you need it. Again, because of the way the barrel is formed, the Model 3000 with the Multi-choke system maintains virtually the same weight, swing and balance as guns without the choke system.

Chambered for 3" Magnum loads, the model 3000 pump shotgun will handle any 2 3/4" load as well.

Barrels are cold hammer forged from molybdenum steel, reamed to gauge, polished and precisely choked for optimum pattern effectiveness.

Dual action bars provide fast, straight-line pumping, smooth feeding and positive ejection.

Stock and fore-end are fashioned from selected American walnut (except for 2 3/4" slug guns, which have walnut finished hardwood stocks).

NEW

Model 3000 20 gauge Multi-choke.

We've made the Multi-choke system available for pump gun shooters who prefer a 20 gauge shotgun.

Pump Shotgun Features and Specifications

MODEL 3000 PUMP SHOTGUNS

Style.

Target Shotguns

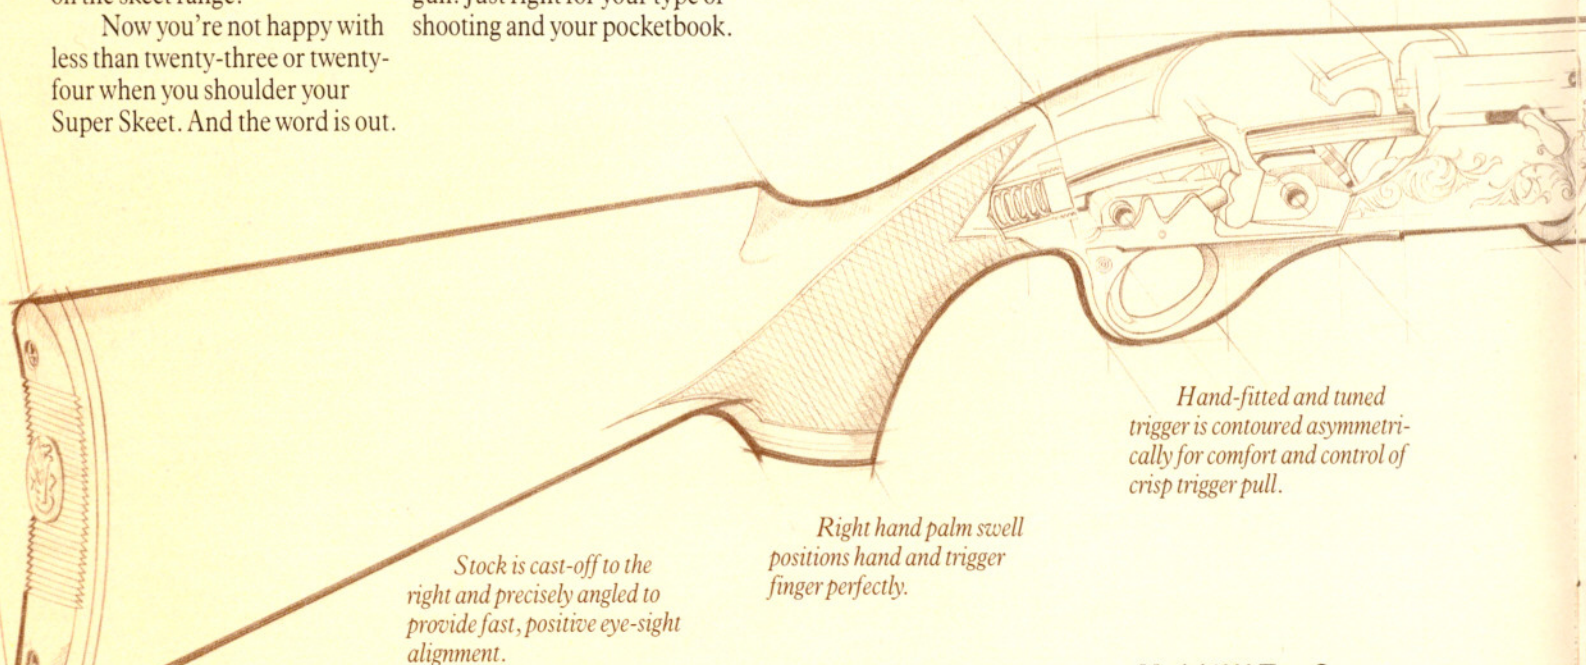

You sense the thrill and excitement of the teenager as she breaks her first clay target. And, as you introduce the fun of shooting to a new generation, you experience a new pleasure. It brings back the pride you felt at breaking seven targets your first time out on the skeet range.

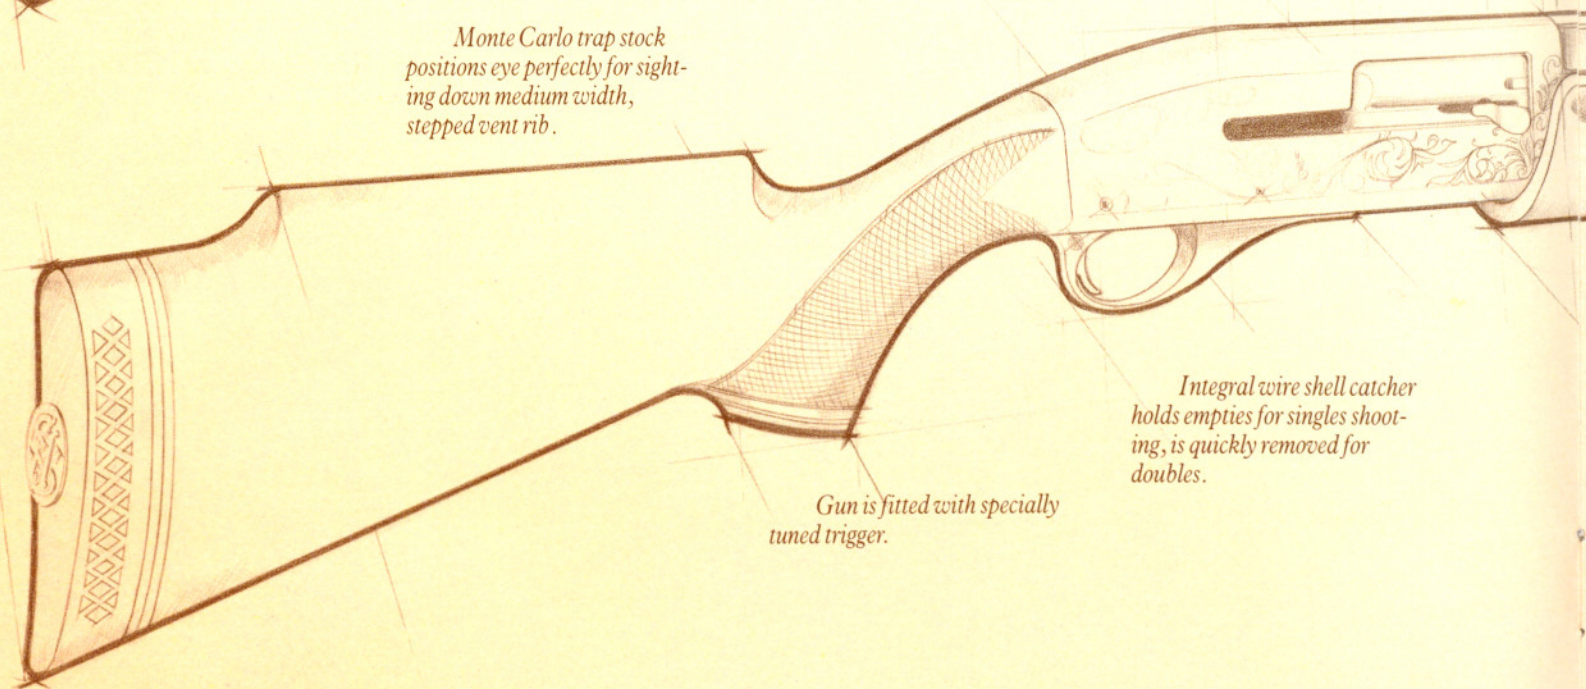

Now you're not happy with less than twenty-three or twenty-four when you shoulder your Super Skeet. And the word is out.

People who shoot Model 1000 target guns are smoking targets and winning trophies. And now there's a wider choice than ever of these outstanding performers. Skeet and Super Skeet guns in both 12 and 20 gauge and the new 12 gauge Model 1000 trap gun. Just right for your type of shooting and your pocketbook.

Model 1000 Super Skeet

Model 1000 Trap Gun

Center track on wide, matte-finished vent rib combines with mid-point bead and fluorescent red Bright Point front sight to keep you on target.

Special recessed skeet choke provides more uniform distribution of shot within the pattern.

Fifteen special muzzle vents, five on each side and five on the bottom, soften recoil and reduce muzzle jump.

White mid-point bead and a Bradley front bead bring you right on target.

Multi-choke barrel comes with modified, improved modified and full tubes to tailor gun for handicap shooting.

NEW

Model 1000 Trap Gun

One look is all you'll need to see that there is another very special member of the Model 1000 family – The 12 gauge 2¾" steel receiver Model 1000 Trap Gun.

Of course, this gun incorporates all the quality workmanship and features that make the Model

1000 autoloader such a great performer. In addition, it has a raft of special features that make it an outstanding value for your trap gun dollars.

This gun has a Monte Carlo trap stock. Its medium width step rib has a white mid-point bead

and a Bradley front bead that brings you right on the target. There's an integral wire shell catcher which holds the empties for singles and which can be quickly removed for doubles. The trigger has been specially tuned.

And each gun has a 30" Multi-choke barrel with modified, improved modified and full tubes to allow you to tailor your Model 1000 trap gun for handicap shooting.

Target Shotgun Features and Specifications

Handguns

The big .44 Magnum seems to be an extension of your arm as you line up that ram at 200 meters. You know that target will fall when you squeeze off that round. There's just something special about a Smith & Wesson handgun.

More than just S&W's smooth, fast double action.

Acclaimed as the world's smoothest. Or crisp, clean single action. More than just the right combination of weight and balance. And more than perfection in finish.

It's a feeling that you can't find a better handgun.

A feeling that comes from the knowledge that dedicated craftsmen and skilled fitters don't

rest until every part mates perfectly in a handgun that functions as only a Smith & Wesson can.

Smith & Wesson revolvers are built on four frame sizes. Each frame, including the top strap and grip areas, is machined from a single, strong forging.

Revolvers built on the J frame, S&W's smallest, are

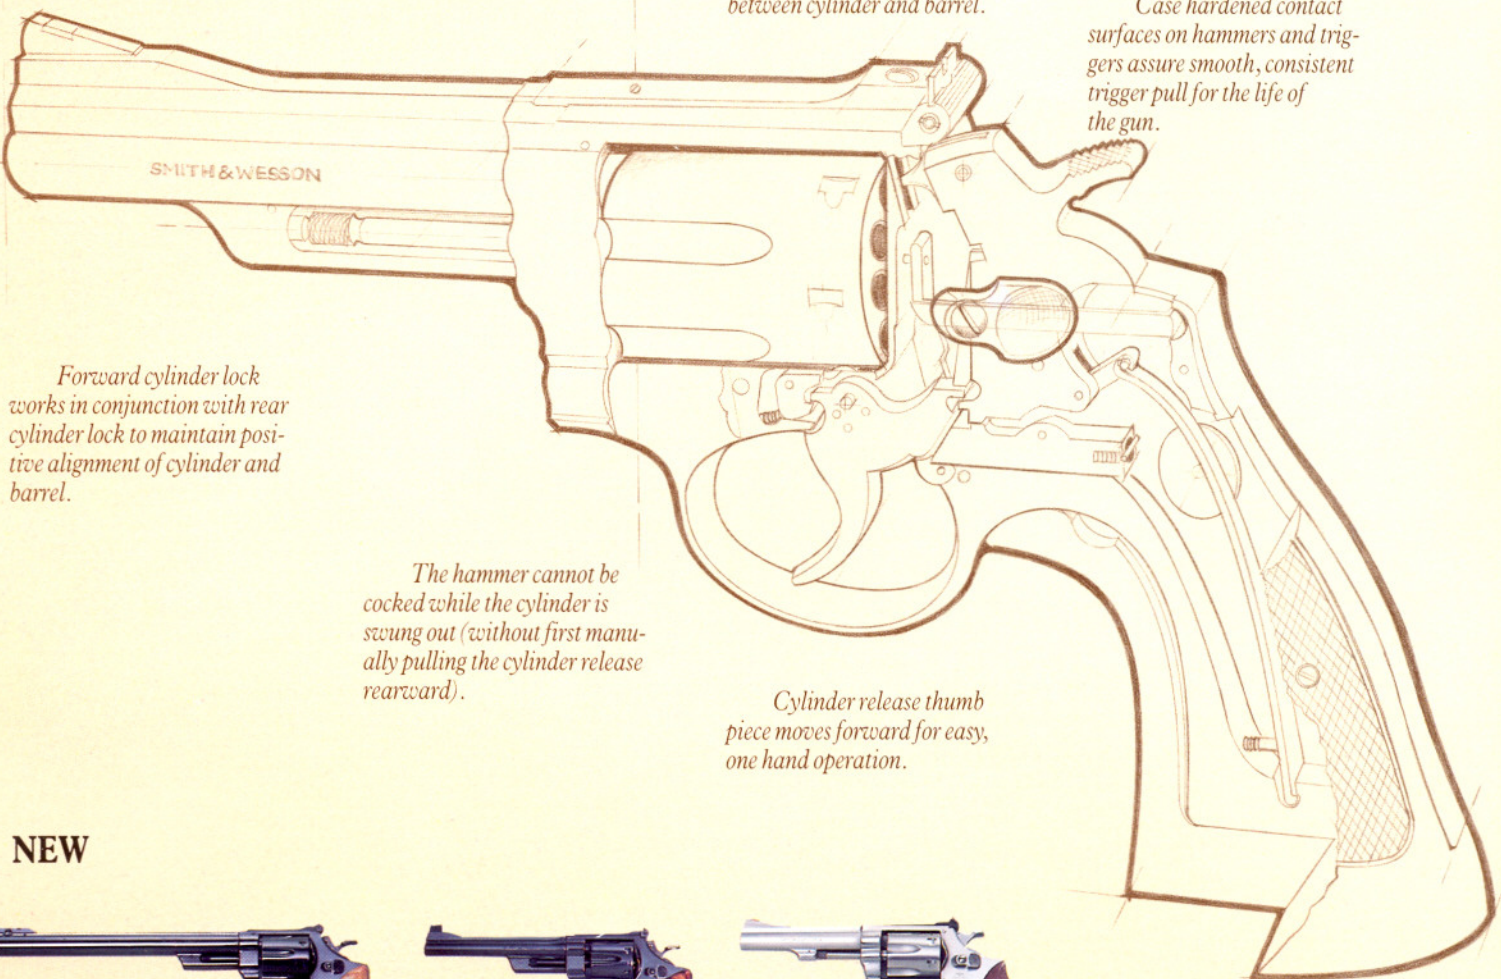

unique among small frame guns in their ability to stay in time. Cylinder charge holes always line up properly with the barrel in these lightweight, compact, easy to carry handguns.

A wide range of calibers, in a variety of barrel lengths, are built on the versatile medium size K frame. K frame revolvers provide

S&W's internal hammer block is not subject to fouling by foreign material – an important secondary safety feature.

Case hardened contact surfaces on hammers and triggers assure smooth, consistent trigger pull for the life of the gun.

Hardened bearing area minimizes wear in cylinder lock, assures proper alignment between cylinder and barrel.

Forward cylinder lock works in conjunction with rear cylinder lock to maintain positive alignment of cylinder and barrel.

The hammer cannot be cocked while the cylinder is swung out (without first manually pulling the cylinder release rearward).

Cylinder release thumb piece moves forward for easy, one hand operation.

NEW

Model 29 Silhouette.

Here's a Smith & Wesson made specially for Silhouette shooters. And it's a beauty, with a 10⁵/₈" barrel with an adjustable 4 position front sight that allows a change in elevation without adjusting the rear sight.

Model 24 .44 Special.

Identical to the old favorite, the Model 24 is back by popular demand for handgunners who prefer the .44 Special cartridge. The Model 24 is available with 4" or the tapered 6¹/₂" barrel.

Model 651 .22 M.R.F. Kit Gun.

You've asked us to make the versatile S&W Kit Gun in magnum rim fire. Here it is, in stainless steel, with a 4" barrel, square butt and adjustable sights. Also available as Model 650 with a 3" barrel, round butt and fixed sights.

S&W's smooth, fast double action is provided by a balanced design of rebound, trigger and main spring tensions coordinated with a fast, spring-operated cylinder stop.

an unmatched variety of hammers, sights and trigger styles, too.

The new L frame has been designed specifically to meet the new and more rigorous demands imposed on .357 Magnum revolvers by today's shooting practices and ammunition. Though only slightly larger than the K frame, the new L frame provides more

metal around the barrel thread and in the top strap and accommodates a sturdier cylinder. The L frame is built to digest a sustained diet of today's punishing Magnum loads.

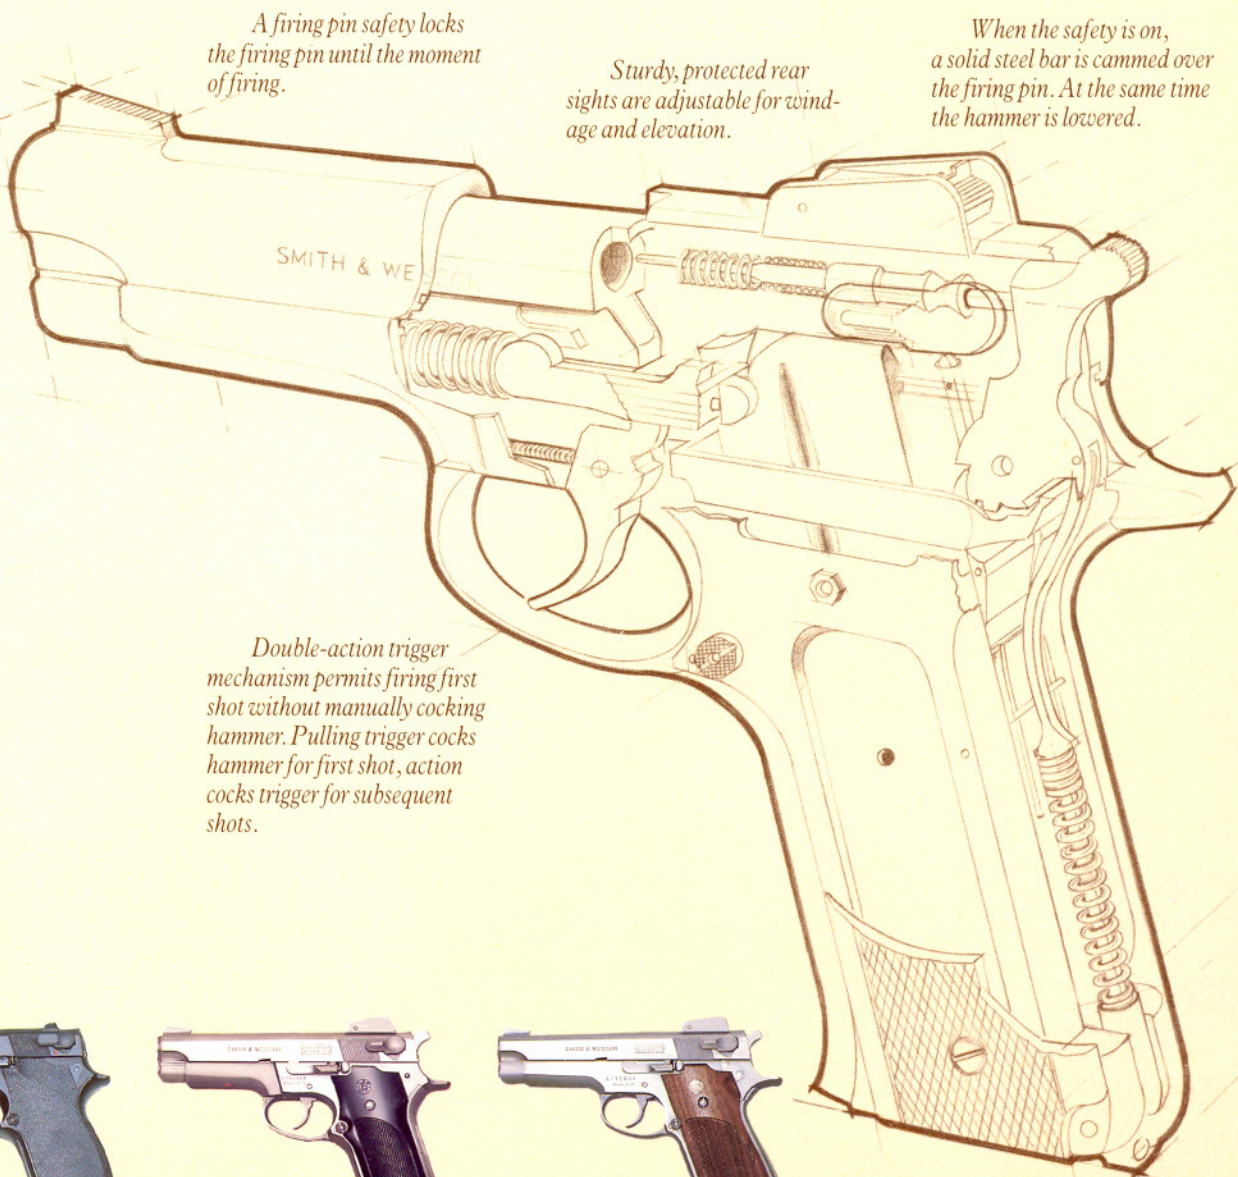

N frame revolvers, built on S&W's largest frame, are favorites for handgun hunting, metallic silhouette and other competitive

shooting. Again the shooter is offered unmatched versatility in stocks, trigger styles and hammers as well as a wide range of calibers.

Smith & Wesson also offers a line of semiautomatic pistols to meet the needs of competitive shooters and sportsmen, including the reliable accurate Models

439, 459, 469, 639 and 659 in 9mm. The Model 41 and Model 52 are among the most accurate out-of-the-box target pistols available.

You'll find the handgun you want to meet your specific needs in the Smith & Wesson line – the broadest line on the market.

A firing pin safety locks the firing pin until the moment of firing.

Sturdy, protected rear sights are adjustable for windage and elevation.

When the safety is on, a solid steel bar is cammed over the firing pin. At the same time the hammer is lowered.

Double-action trigger mechanism permits firing first shot without manually cocking hammer. Pulling trigger cocks hammer for first shot, action cocks trigger for subsequent shots.

A magazine disconnect prevents the functioning of the gun without a magazine in place.

Model 469 9mm Mini-Gun.

This exciting new S&W 9mm auto is basically a cut-down, 12-round version of the Model 459.

Model 659 9mm Stainless Auto.

We've also made the 14-round version of our dependable auto available in stainless steel.

Model 639 9mm Stainless Auto.

Now the famous S&W auto design is available in stainless steel. Model 639 is the 8-round version.

Complete descriptions of these new guns may be found on the following pages.

.22 CALIBER

Model 17, the K-22 Masterpiece.

In .22 Long Rifle, this is a serious target shooter's six-shot revolver built on the medium size K frame. The front sight is a 1/8" plain Patridge, the rear is S&W micrometer click sight, adjustable for windage and elevation. The Model 17 is available with 6" or 8 3/8" barrel, comes with checked walnut service stocks and is finished in S&W blue.

Model 18, the .22 Combat Masterpiece.

In .22 Long Rifle, the six-shot, K frame revolver combines the economy of shooting .22 ammunition with the weight and feel of a .38 revolver. The front sight is a 1/8" Baughman Quick Draw on a plain ramp, the rear is S&W's micrometer click sight. Model 18 is available with a four-inch barrel, checked walnut service stocks and is finished in S&W blue.

Model 34, 1953 Kit Gun

The world famous 1953 .22/.32 Kit Gun for campers and fishermen, in .22 Long Rifle, is a six-shot revolver built on the smaller J frame. The front sight is a fixed serrated ramp, the rear S&W micrometer click sight. Model 34 is available with two or four-inch barrels, checked walnut round or square butt service stocks and finished in either S&W blue or nickel.

Model 48, the K-22 Masterpiece, M.R.F.

In .22 Magnum Rim Fire, this six-shot K frame revolver is ideal for small game hunting. Available with 4", 6" or 6 3/8" barrels. The rear sight is S&W's micrometer click sight. Front sights are Baughman Quick Draw on a ramp base with 4" barrel, plain Patridge on ramp base with 6" and 8 3/8" barrels. Stocks are checked walnut service. The finish is S&W blue. And an auxiliary cylinder in .22 Long Rifle is available.

Model 41, the .22 Target Autoloading Pistol

This fine target auto, in .22 Long Rifle, has a 10 round magazine. It's available with a 7" barrel with a 1/8" Patridge undercut front sight and an S&W micrometer click sight on the rear. The 5 1/2" heavy barrel version has a 1/8" Patridge undercut on a ramp base front sight and an S&W micrometer click sight with a wide sight slide on the rear. Stocks are checked walnut with a modified thumb rest equally adaptable for right or left hand shooters. The grooved 3/8" wide trigger has an adjustable stop. And the finish is S&W bright blue.

Model 63 Stainless Steel Kit Gun

Here's the stainless steel version of the Model 34 Kit Gun. It's

only available with a four-inch barrel and a square butt. Other specifications remain the same.

Model 651, .22 M.R.P. Stainless Steel Kit Gun

The answer to many requests, here's the famous Kit Gun in .22 Magnum Rim Fire. Built on the J frame, it has a 6 shot cylinder. 4" barrel and checked walnut square butt service stocks. Front sight is S&W red ramp on ramp base; rear is S&W's adjustable micrometer click sight. Also available with 3" heavy barrel, round butt service stocks and fixed sights as Model 650.

.38 CALIBER

Model 15, the Combat Masterpiece

In .38 S&W Special, Model 15 is a six-shot K frame revolver. Front sight is a 1/8" Baughman Quick Draw on a plain ramp, the rear S&W's micrometer click sight. Available with 2" or 4" barrel, the Model 15 has checked walnut service stocks and is finished in either S&W blue or nickel.

Model 36, Chiefs Special

This five-shot revolver, in a .38 S&W Special, is built on the J frame. Probably the world's most popular small frame handgun for off-duty police officers, Model 36

is available with a 2" or 3" barrel, has a fixed serrated ramp front sight and a square notch rear sight. It has checked walnut, round or square butt service stocks and is finished in either S&W blue or nickel.

Model 52, the .38 Master

Here's S&W's famous single action, semiautomatic target pistol designed specifically to fire .38 S&W Special mid-range wadcutters from its five round magazines. Barrel length is 5". The front sight is a 1/8" Patridge on a ramp base, the rear S&W micrometer click sight with a wide sight slide. Grips are checked walnut, the grooved trigger is 3/8" wide with an adjustable trigger stop, and the finish is S&W bright blue with sandblast stippling around the sighting areas to break up light reflection.

Model 60

S&W's Model 60 is the famous stainless steel version of the famous Model 36 Chiefs Special. It's available only with a 2" barrel. All other specifications remain the same.

Model 67

Here's the stainless steel version of the Model 15 Combat Masterpiece. Available only with a four-inch barrel, its front sight is 1/8" S&W Red on a ramp base, the rear is S&W micrometer click

sight in black stainless steel. Stocks are checked walnut service with square butt.

9MM

9MM

Model 439 Autoloading Pistol

Model 439 is an alloy frame, eight-round autoloading pistol designed for 9mm Luger and Parabellum loads. It features a new adjustable rear sight and three safeties. The protected rear sight is a guard notch with micrometer click adjustment for windage and elevation. The front sight is a $\frac{1}{8}$ " serrated ramp. The three safeties include a manual safety, magazine safety and the new firing pin safety which locks the firing pin until the trigger is pulled completely to the rear. Gun may be ordered with an ambidextrous manual safety for left handed shooters. Stocks are checked walnut and the Model 439 is available in either S&W blue or nickel.

Model 459 Autoloading Pistol

The Model 459 is a 14-round version of Model 439. It has the same safety systems, the same new adjustable rear sight, the same front sight as Model 439. Stocks are checked high-impact molded nylon. The gun is available in S&W blue or nickel.

Model 469 9mm "Mini Gun"

S&W's new Model 469

"Mini Gun" is an alloy frame, twelve round, 9mm autoloading pistol. Front sight is a serrated yellow ramp; rear sight is a dovetail mounted square notch adjustable for windage only. Features include crosshatch checkering on the recurved front trigger guard and curved backstrap, and magazine buttplate with a curved finger extension. Finish is sandblast blue with pebble grain molded grips.

Model 639 Autoloading Pistol

This is the stainless steel version of the popular S&W Model 439. Eight-round autoloading pistol. All other specifications remain the same.

Model 659 Autoloading Pistol

The Model 659 is the stainless steel version of the 14 round model 459 9mm autoloading pistol. All other features and specifications remain the same.

Model 547 9mm Revolver

The Model 547 is Smith & Wesson's 9mm revolver which features a unique new extraction system with retractable leaf springs for each of the cylinder charge holes. As the extractor rod is pushed, the leaves pop out to engage the indent in the cartridge case for positive extraction. Built on the K frame, the Model 547 six-shot revolver is available with a 3" or 4" barrel. Front sight is a

$\frac{1}{8}$ " serrated ramp, rear is a $\frac{1}{8}$ " fixed square notch. Stocks are checkered service square butt on the 4" barrel, checkered walnut round butt with speed loader cutaway on the 3" barrel.

.357 Magnum

Model 19 Combat Magnum

The Model 19, the .357 Combat Magnum, is a six-shot, .357 Magnum revolver built on S&W's medium size K frame. It's available with 2 $\frac{1}{2}$ ", 4" and 6" barrels with a $\frac{1}{8}$ " Baughman Quick Draw front sight on the 2 $\frac{1}{2}$ " and 4" barrel versions and a $\frac{1}{8}$ " Patridge on the 6" model, ideal for a hunting handgun. All have S&W micrometer click stop rear sights. Stocks are checked Goncalo Alves with a speed loader cut for the 4" and 6" versions, and checked walnut round butt service stocks for the 2 $\frac{1}{2}$ " model. Finish may be either S&W bright blue or nickel.

Model 27

Here's a sturdy six-shot, .357 Magnum revolver built on S&W's large N frame to absorb the energy of high velocity hunting loads. Model 27 is available with 4", 6" or 8 $\frac{3}{8}$ " barrels. The 4" barrel has an S&W red ramp front sight and a white outline micrometer click rear sight. The 6" and 8 $\frac{3}{8}$ " barrels have Patridge front sights and plain track micrometer click rear sights. The Model 27 comes with checked Goncalo

Alves target stocks and is finished in either S&W bright blue or nickel with a finely checked top strap and barrel rib. An optional presentation case is available.

Model 28 Highway Patrolman

The .357 Highway Patrolman is a six-shot, N frame, .357 Magnum revolver. Front sight is a $\frac{1}{8}$ " Baughman Quick Draw on a plain ramp, and the rear is an S&W micrometer click sight. Model 28 is available with 4" or 6" barrels, has checked walnut service stocks and is finished in S&W satin blue with sandblast stippling on the barrel rib and frame edging. Walnut target stocks are available at a slight extra cost.

Model 586 Distinguished Combat Magnum

Model 586 is S&W's new Magnum of the 80's - the all new L frame, six shot .357 Magnum revolver with a beefed up cylinder and a heavy weight barrel with a full length, extractor shroud. Model 586 is available with 4" and 6" barrels and has a .375" wide semi target hammer and a .312" smooth combat trigger. Front sight is a $\frac{1}{8}$ " Baughman with an S&W red ramp on the 4" barrel, and either a $\frac{1}{8}$ " plain Patridge or $\frac{1}{8}$ " Baughman with an S&W red ramp on the 6" barrel. Rear sight is a fully adjustable S&W micrometer click sight. Stocks are checked Goncalo Alves target models with a speed loader cutaway. Finish may be either S&W blue or nickel.

Model 66 Stainless Combat Magnum

The Model 66 is the stainless steel version of the Model 19 .357 Combat Magnum. Except for its sights, which are an S&W Red Ramp on a ramp base for the front and S&W black stainless steel micrometer click sight on the rear, specifications are the same as for the Model 19.

Model 686 Stainless Distinguished Combat Magnum

Model 686 is the stainless steel version of the new L frame Model 586 .357 Magnum. Specifications are the same as for the Model 586.

.41 Magnum

Model 57

The Model 57 is a six-shot, .41 Magnum revolver built on the large N frame for hunting and silhouette shooting. The front sight is a 1/8" S&W Red Ramp, the rear S&W's micrometer click sight with a white outline notch. The gun is available with 4", 6" or 8 3/8" barrels, comes with checked Goncalo Alves special oversize target stocks and may be finished in S&W bright blue or nickel.

.44 Special

Model 24

An old favorite returns to the S&W line, in a limited edition of 7500 pieces, in response to popular demand. The Model 24 .44 Special is built just the way it was thirty years ago... on the rugged, heavy N frame, with either a 4" or 6 1/2" barrel with the original Model 24 taper. Front sights are a black ramp on the 4" barrel and a black Patridge on the 6 1/2" barrel. Rear sight is S&W's fully adjustable micrometer click sight. The Model 24 has checkered Goncalo Alves target stocks and the finish is S&W bright blue with grooved top strap and barrel rib.

Model 29 Silhouette

S&W has built a Model 29 .44 Magnum specifically for metallic silhouette shooters. The Model 29 Silhouette features a 10 5/8" barrel with a four position adjustable front sight with a 1/10" Patridge blade. This allows for a quick change of elevation (with a positive click from position to position) without rear sight adjustment. Rear sight is the fully adjustable micrometer click sight with a special high rear blade. Finish is S&W bright blue with checkered Goncalo Alves target stocks.

.44 Magnum

Model 629

The Model 629 is the stainless steel version of the Model 29 .44 Magnum. The Model 629 is available with 4", 6", or 8 3/8" barrels. All other specifications are the same as for the Model 29.

Model 29

S&W's Model 29, a six-shot, .44 Magnum, N frame revolver, is a favorite of handgun hunters. It is available with 4", 6" or 8 3/8" barrels. Front sight is the S&W Red Ramp, rear is S&W's micrometer click sight with a white outline notch. Stocks are special oversize target models of checked Goncalo Alves. Finish may be either S&W bright blue or nickel. The Model 29 is available with or without a presentation case.

.45 Caliber

Model 25

The Model 25, in .45 Colt, is a six-shot, N frame revolver for those who prefer a heavier hunt-

ing load. It is available with 4", 6" or 8 3/8" barrels. Front sight is a 1/8" S&W Red Ramp, the rear an S&W micrometer click sight with a white outline notch. Model 25-5 has a checked target type hammer and a grooved target type trigger and is furnished with checked Goncalo Alves target stocks. Finish is S&W bright blue.

HANDGUN ACCESSORIES

If you're a Smith & Wesson handgun enthusiast, you'll want to look for S&W's display of handgun accessories at your favorite gun shop.

Target and Combat Stocks

You'll find checkered and plain target stocks in beautifully grained Goncalo Alves and checkered walnut for every revolver in the Smith & Wesson line. Round and square butt J frame, round and square butt K and L frame, and square butt N frame.

There are new combat stocks in Goncalo Alves, too, for round butt J and K frames and square butt J, K and L frames.

Target and rear sights

White outline rear sight assemblies are included for K and L frame revolvers, Model 25-5, Models 25 and 27 with 8 3/8" barrels. Plain rear sight assemblies for Models 39 and 59 semiautomatic pistols.

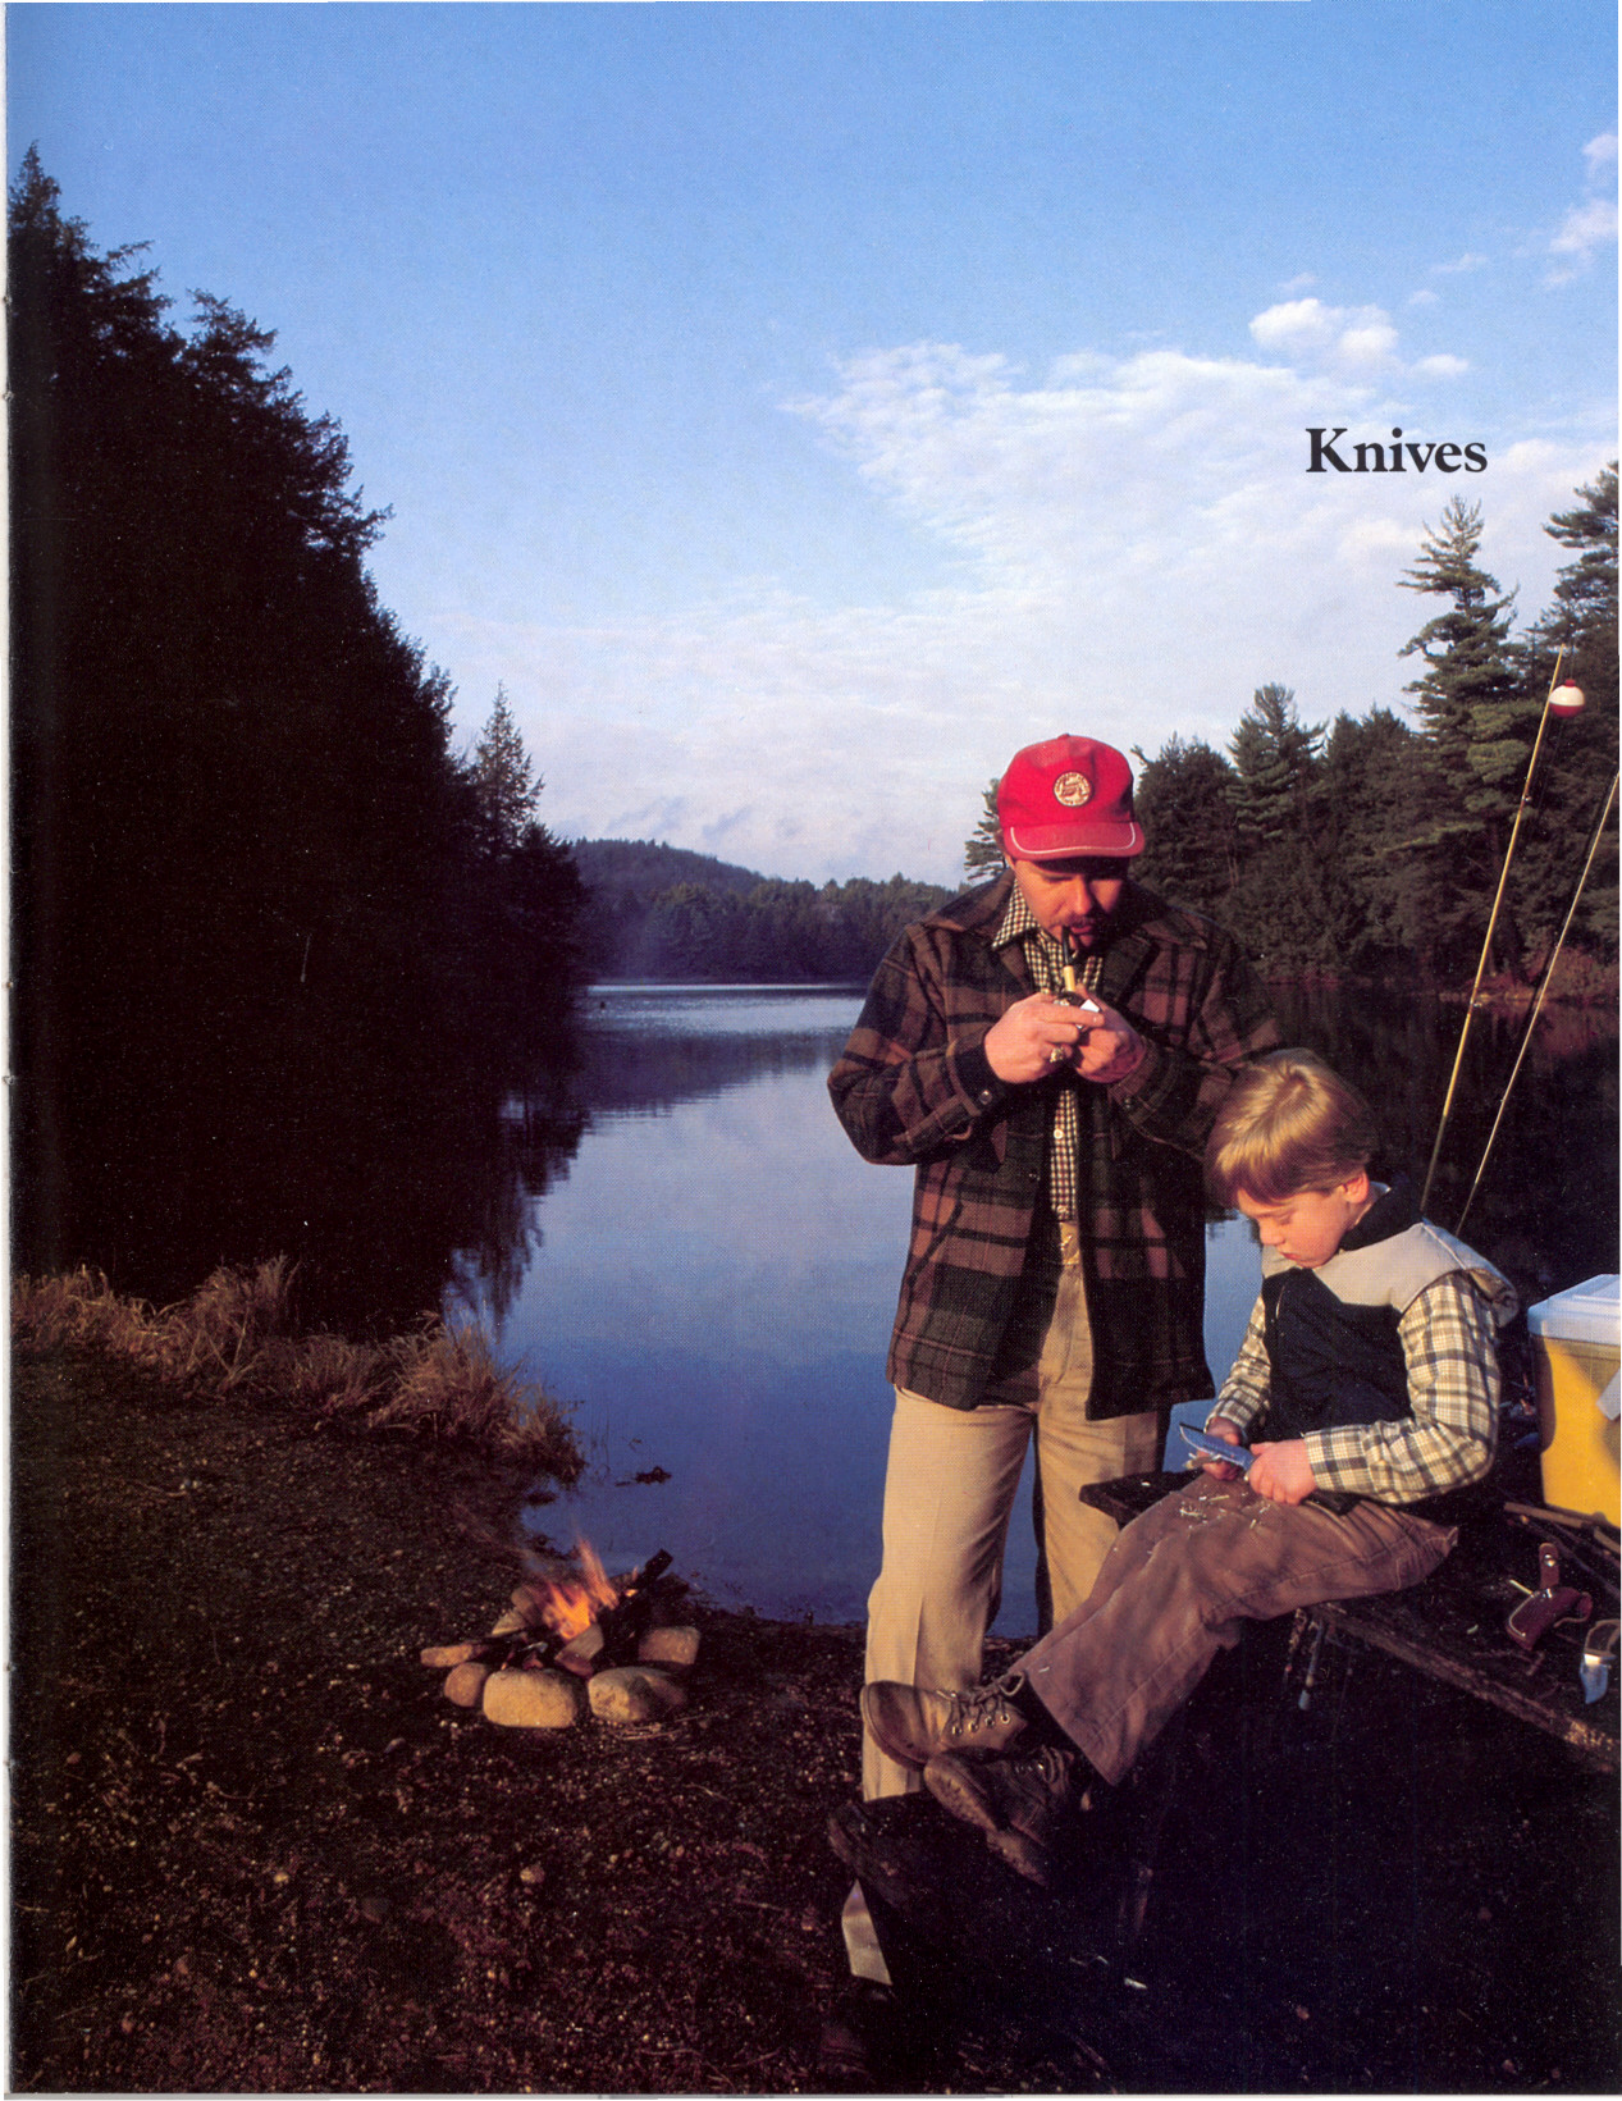

Target Triggers and Hammers

There are .400" wide target triggers, either smooth or serrated for K, L, and N frame revolvers and a single action trigger kit for all K frame revolvers except .22 caliber.

You'll find target hammers, too, .500" wide for all K frame centerfire and N frame handguns and .400" wide for N frames.

And there's more. The handy S&W screwdriver. Cotton swabs for .22, .38/.357 and .44 calibers. Wire brushes for the same calibers. And halfmoon clips for Model 25-2 (.45 ACP).

Knives

The fishing poles have been put up for the night. The camp-fire is nearly ready for the hot dogs. And the sticks to cook them with are just about whittled.

The last warm rays of the setting sun bring an end to a day a boy will remember forever. Because that was the day his Dad trusted him with his first knife. And he'll remember just how right it felt.

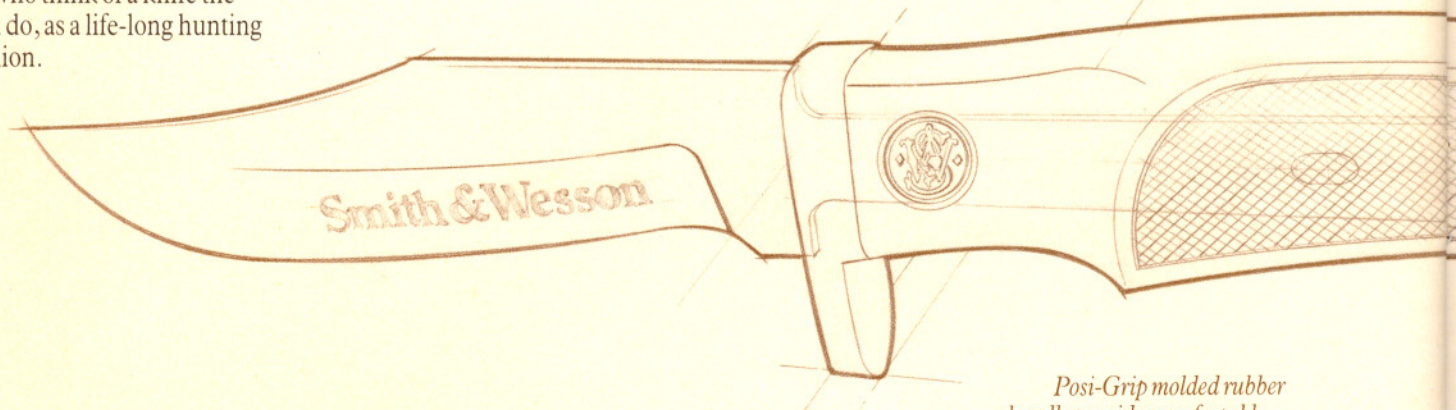

You know when a knife is just right for you. You feel it in the easy, comfortable fit of handle to hand, the perfect combination of balance and weight and the shape of a perfectly ground blade.

Smith & Wesson knives have been designed and are made by people who know the qualities that make a good working blade. People who think of a knife the way you do, as a life-long hunting companion.

We carefully select specific heats of 440 stainless steels for our blades. Each blade is flat ground to achieve a perfect symmetry of surfaces and grind lines, the same way knives are made for "professionals" like chefs and meat cutters. The final edge on each knife is individually ground, tested and inspected to insure the exact angle and sharpness you demand.

You'll find the style you want in our broad line. Fixed blades, folding hunters and innovative pocket knives. Each is made with exacting skill and craftsmanship to provide the utmost in quality, performance and value.

And each is made in Smith & Wesson's own knife factory. With pride that you'll share when your choice is Smith & Wesson

Blade is flat ground from 440 stainless steel.

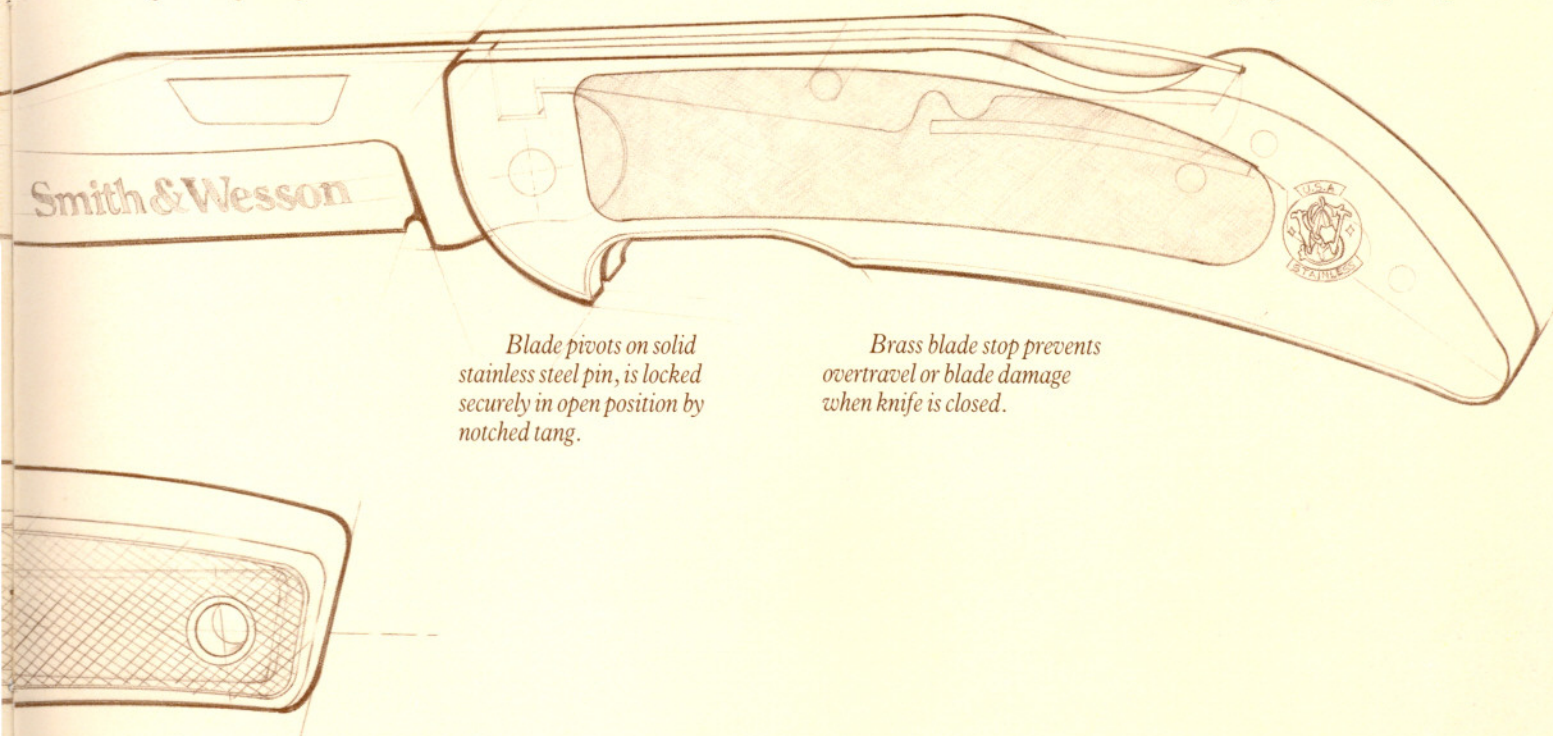

Brass guard aids control, adds to rugged good looks of knife.

Posi-Grip handle is securely locked in place on sturdy stainless steel tang.

Posi-Grip molded rubber handle provides comfortable, sure grip, is shaped for perfect control whether working edge up or edge down.

Blade is flat ground from 440 stainless steel for strength and edge holding ability.

Recessed lock release prevents accidental closing of blade, yet permits easy folding.

Custom Etching

Add a distinctive touch to your Smith & Wesson knife with custom factory etching.

Custom etching is available on the blades or handles of Ultra-Thin knives and on the blades of Mavericks.

These handsomely etched knives make ideal gifts, commemoratives or mementos of special occasions. Custom etching allows you to attractively reproduce any type of line art, logo or verbiage. We can work from your artwork, or, if you prefer, Smith & Wesson will create original art to meet the specific requirements of your club, business or civic organization.

Minimum order on all etched knives is six dozen of a sin-

gle design. Any Smith & Wesson Distributor can provide your dealer with pricing and delivery information.

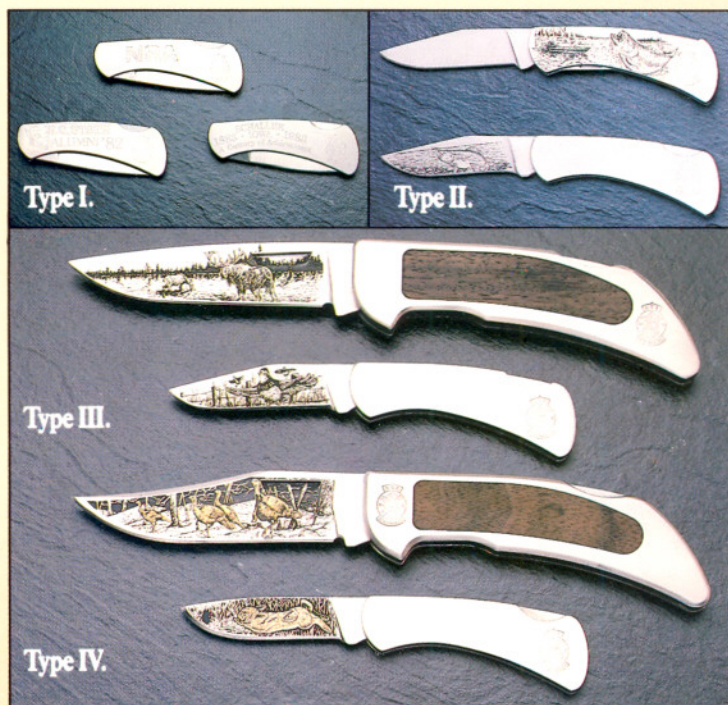

Custom etching is available in four types:

Type I. Ideal for lettering and simple line drawings.

Type II. Provides greater etching detail required for intricate logos, medallions or scenes.

Type III. Deep acid etching provides the ultimate in detail for a distinctive, hand engraved look.

Type IV. Same acid etching as in Type III except Type IV is available with a 10 to 24 carat gold fill. It's ideal for collectors' editions.

American Series Fixed Blade Knives

Available in five distinctive, rugged, working designs, S&W's American Series knives have blades of flat ground 440 stainless steel, full length tangs and checkered rubber "Posi-Grip" handles. All come with sheaths and have a full, five-year warranty.

Model 330100.

Heavy duty hunting knife with 4 3/4" blade.

Model 330200.

Lighter duty hunting, general purpose knife with 3 3/4" blade.

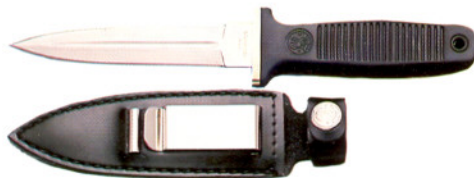

Model 330300.

Versatile general purpose knife with large upsweep configuration 4 7/8" blade.

Model 330400.

Lighter duty general purpose knife with shorter upsweep configuration 3 3/4" blade.

Model 330500.

Boot knife with double edged 4 1/2" blade. Comes with clip-type boot/belt sheath.

Maverick Folding Sportsman's Knives

S&W's maverick folding knives are available in two good looking configurations. Genuine rosewood inlays add a touch of distinction to the contoured stainless steel handles. Blades are flat ground 440 stainless steel with notched tang to lock blade in open position. Soft brass blade-

stop prevents overtravel or blade damage when blade is folded away. Each knife comes with durable Wessonhide™ sheath.

Model 300100.

Features distinctive 3 1/2" clip point blade, folds to 4 1/2" when closed.

Model 300200.

Has a popular drop point 3 1/2" blade, folds to 4 1/2" when closed.

Ultra-Thin Sportsman's Knives

Smith & Wesson's Ultra-Thin combines the functional design of a lock-back sporting knife with the convenience of a pocket knife. Made entirely of stainless steel, these good looking knives are only 1/4" thick and a mere 3" long when closed. And they're contoured to protect your pockets. Open there's 2 1/8" of razor sharp, 440 stainless blade that makes the Ultra-Thin one of the most versatile as well as beautiful knives on the market.

Model 300300.

Clip point Ultra-Thin.

Model 300400.

Drop point Ultra-Thin.

Model 300500.

Shooter's knife with drop point knife blade and screwdriver blade for sight adjustment.

Swing Blade Knives

An innovative Smith & Wesson design, these swing blade knives are crafted entirely from stainless steel for the ultimate in strength and corrosion resistance. Blades are flat ground from 440 Stainless Steel. The shroud securely locks the blade in the open position and encloses and protects the blade when closed.

Model 320100.

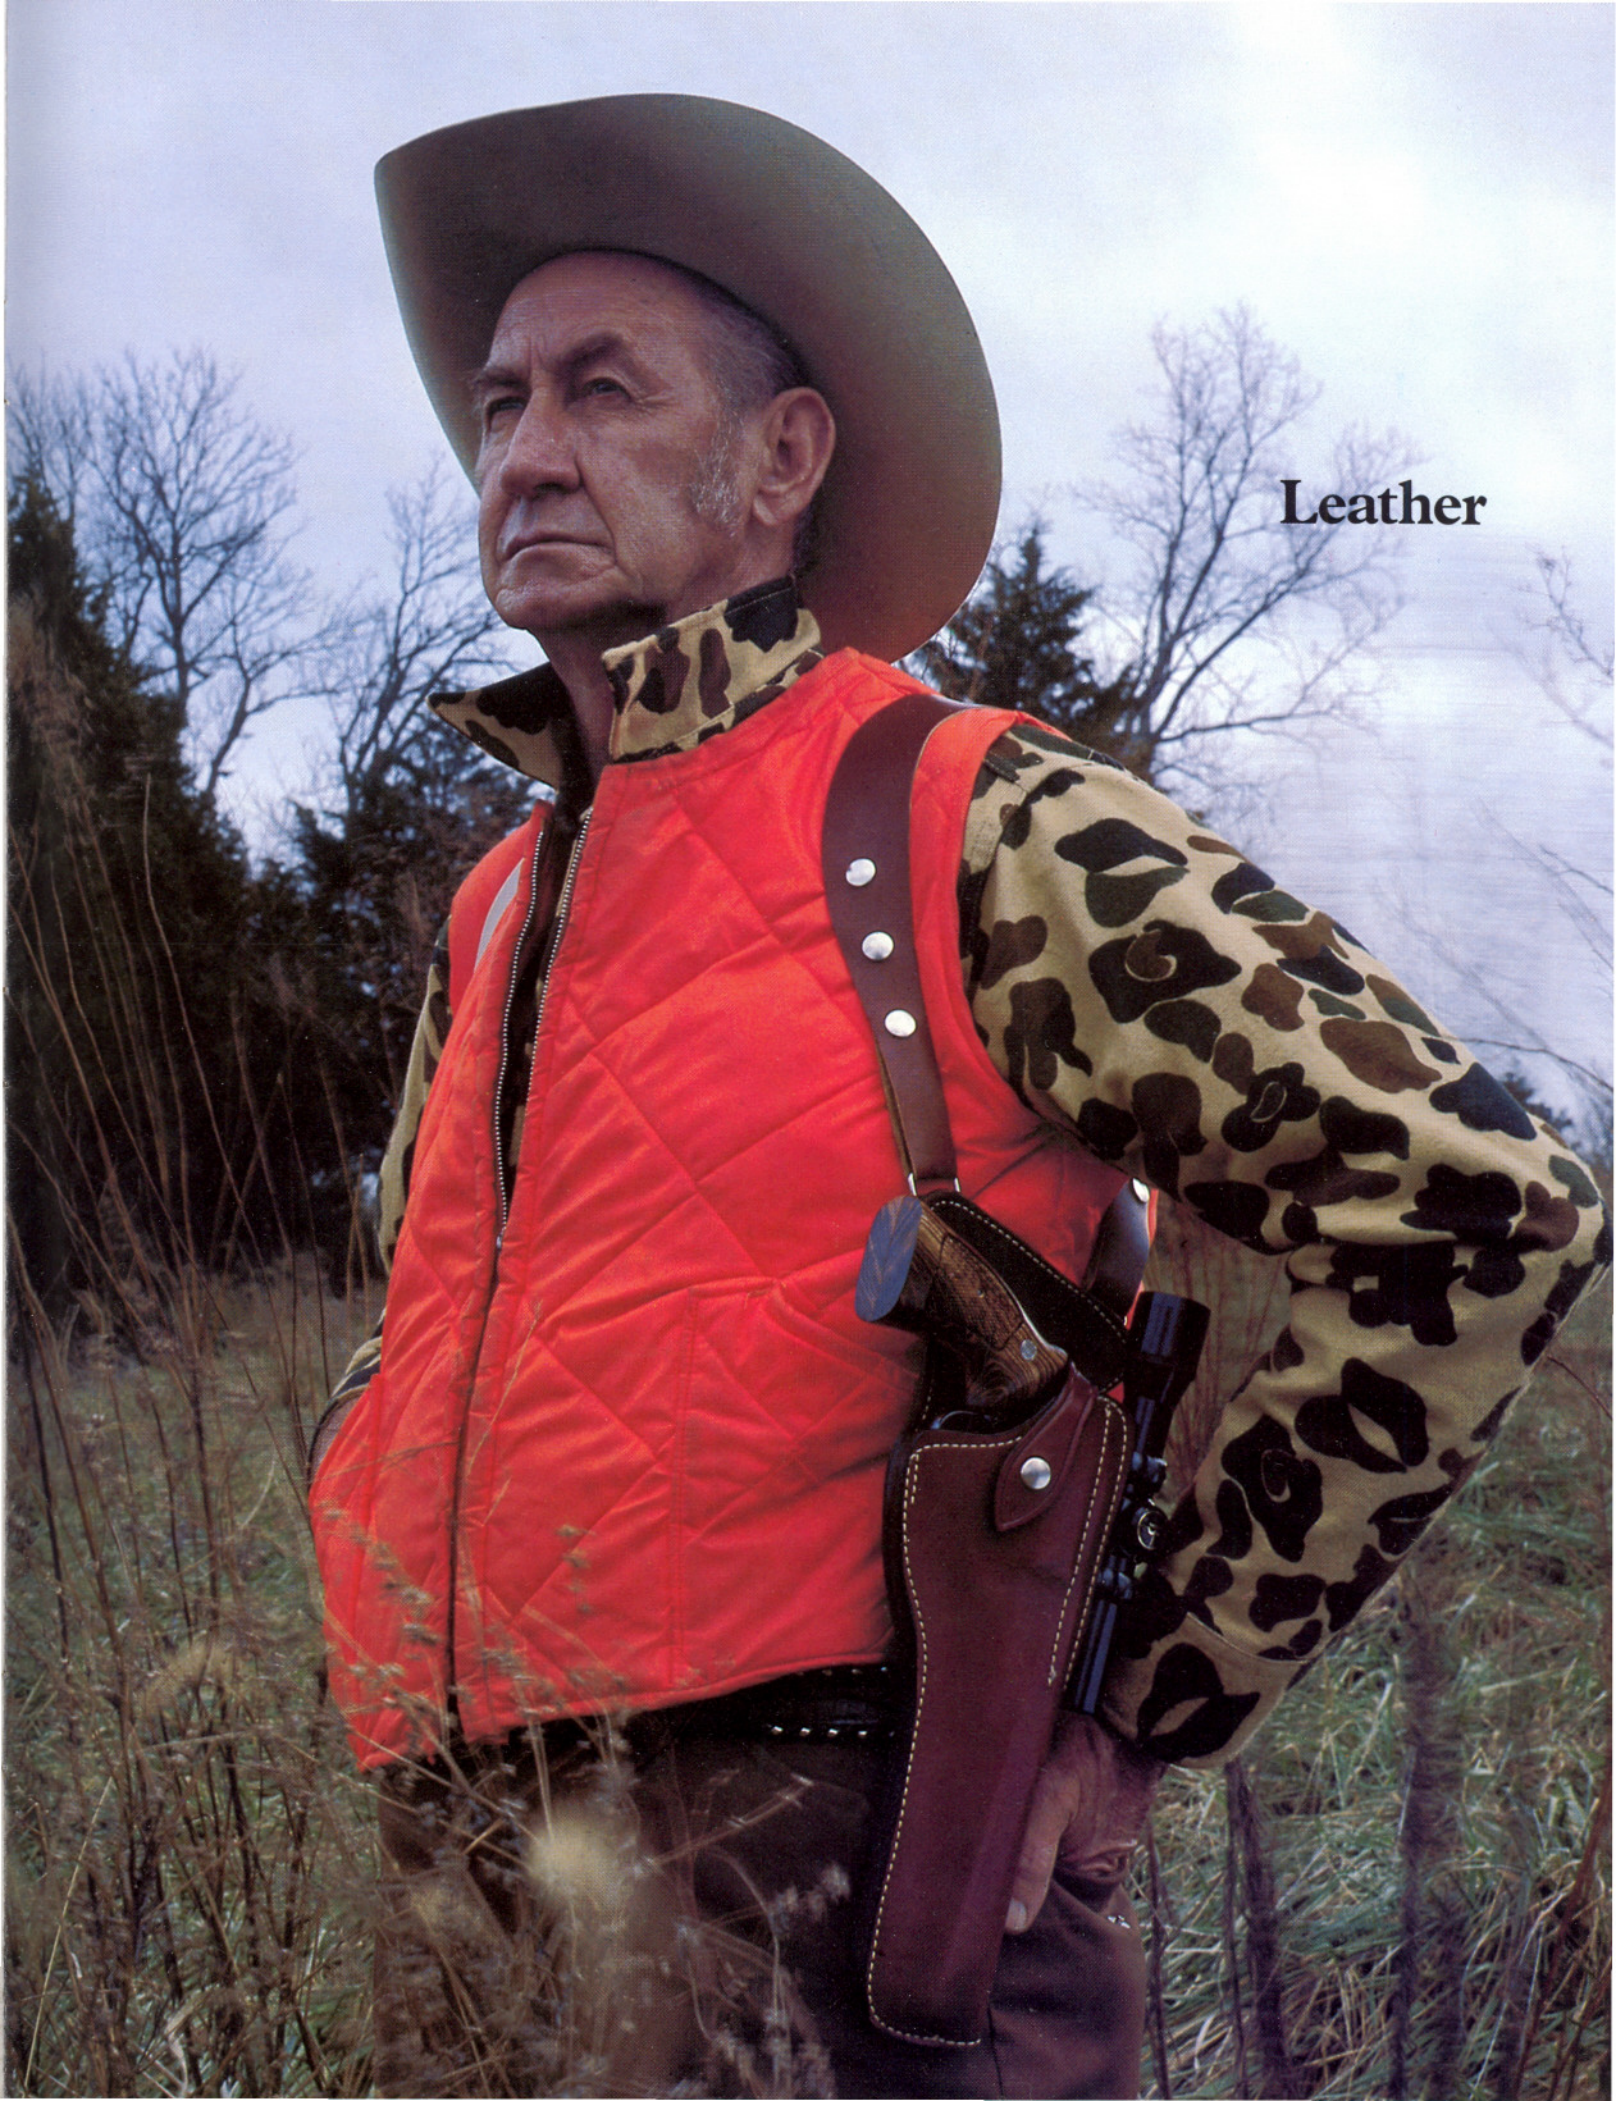

The Swing Blade Sporter has a 3" blade, is 5/16" thick and 4 3/4" long when closed. Furnished with Wessonhide™ pocket sheath. Optional belt sheath available.

Model 320200.

The Swing Blade Boot Knife has a 3 1/2" double edged blade, is 5/16" thick and 4 1/2" long when closed. Furnished with clip type boot/belt sheath.

Leather

He scans the country with the eyes of an eagle. This weather-beaten outdoorsman is an experienced hunter. A man with a special affinity for his guns and his leather.

It takes a shooter to understand the way another shooter feels about leather. Leather to a shooter is more than a select piece of hide, perfectly tanned, molded and sewn into a holster or belt. Leather is more than style, more than rich warm color and heady aroma. Leather is personal. A choice that reflects its owner's individuality.

Smith & Wesson understands. You can see it in the attention to detail, the perfect combination of function, comfort and rugged good looks of each Smith & Wesson holster. You can see how S&W holsters are built to fit the gun, hold it firmly in place and reduce wear on the gun's finish. Each holster is designed to position the gun for a smooth, easy draw as well as provide maximum comfort for its active user.

We've created and built a wide selection of sporting holsters, belts and accessories to meet every taste and demand. Each is crafted with uncompromising attention to quality and detail.

Only select, top grain cowhide, carefully chosen for strength, consistent thickness and texture, is used in Smith & Wesson leather. Sewing is done with pride. Hand polishing is done with meticulous care. And every piece gets a long, hard look from inspectors who check every detail to make sure it meets our shooter's standards.

When your choice is Smith & Wesson leather, your choice is style, comfort and durability in leather you can wear with confidence and pride.

Each holster is molded to fit the gun for which it is intended.

Hammer strap is creased to add a good looking finishing touch and stitched in place, not riveted.

Rear sight protector

Mating side of heavily plated nickel snap is recessed under lining leather to prevent damage to weapon.

S&W's basketweave impression is deep cut for long lasting appearance.

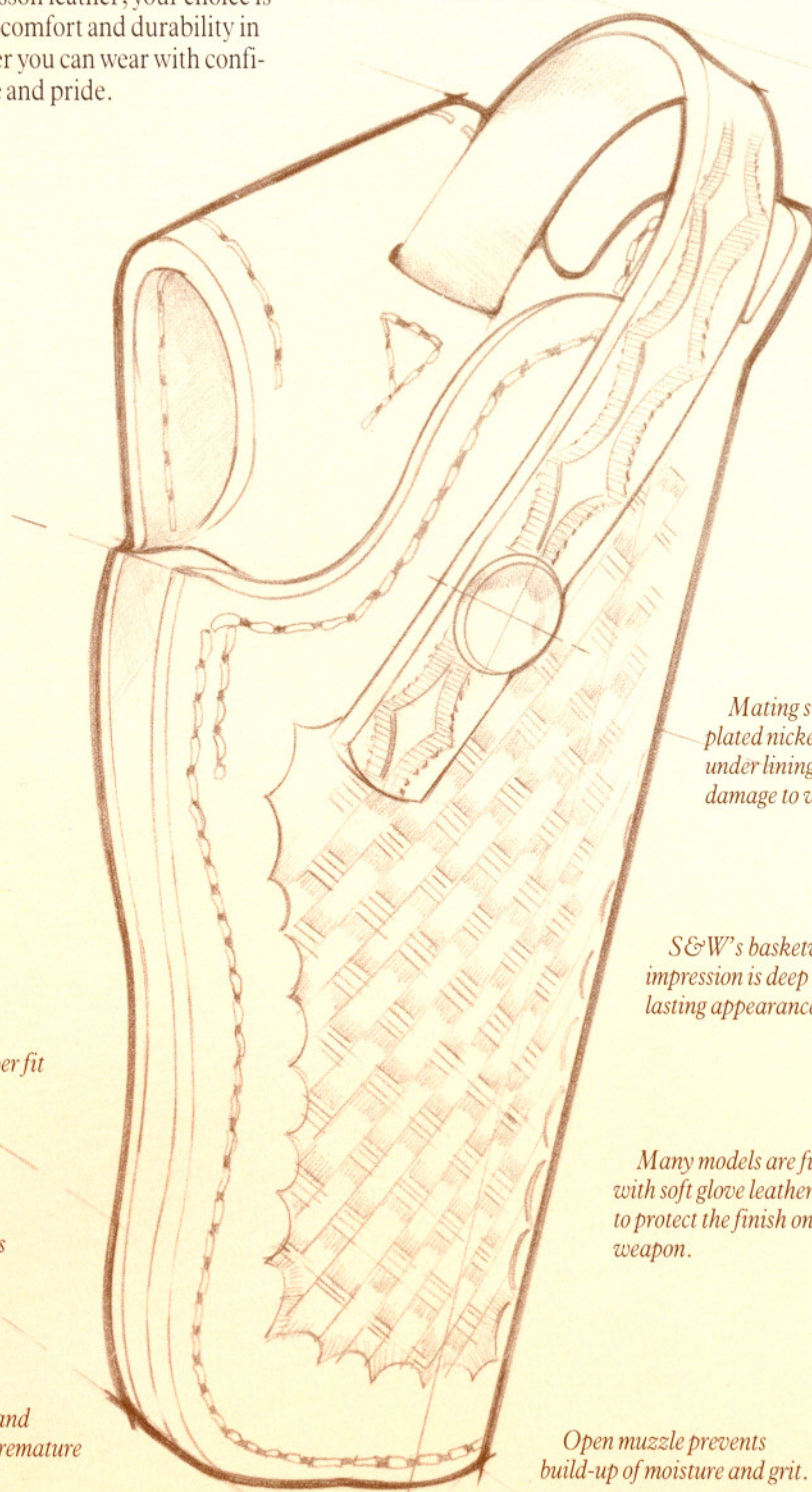

Many models are fully lined with soft glove leather or suede to protect the finish on the weapon.

Open muzzle prevents build-up of moisture and grit.

Full leather welt adds strength, helps insure proper fit of holster to gun.

Meticulous stitching with dacron polyester thread and back stitching on stress points provide strength, durability and good looks.

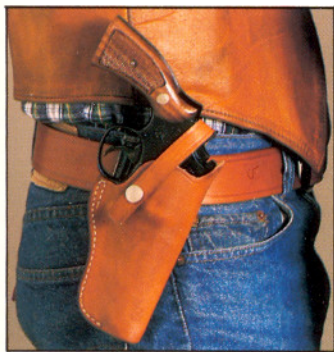

Edges are rounded and burnished to prevent premature wear.

HOLSTERS

Model 02 Off Duty

Here's a smartly styled, snug fitting holster designed to accommodate most small, medium and large frame revolvers with 2" to 6 1/2" barrels. The Model 02 has a single retaining strap and a sight protector. It's available in black or russet, plain or basket weave to fit 1 3/4" belts.

Model 05 Spring Clip

This new S&W design is as functional as it is good looking. The Model 05 features the popular paddle thumb break, is lined with brown suede, has a closed muzzle and is molded to provide heavy definition in the leather. A spring-steel reinforced belt tab (for 1 3/4" belts) keeps the holster snug and securely in place. The

Model 05 is available in brown only for small and medium frame revolvers and S&W 9mm auto-loading pistols.

Model 09 Inside Trouser

Ideal for wear with today's popular beltless slacks, the Model 09 inside trouser holster provides carrying comfort and concealment for small and medium frame revolvers and automatics with 2" to 4" barrels. This holster has an offset chromed clip to

reduce bulk, a smooth top grain interior, a closed muzzle and covers the trigger. The Model 09 is available in natural suede finish with a 1 3/4" clip.

Model 11 Automatic

S&W's Model 11 Automatic holster fits most of today's popular medium and large frame automatics. A rugged design, the Model 11 is a high-ride holster with a single retaining strap. For 1 3/4" belts, it's available in black or russet, plain or basket weave.

Model 21 Blazer

One of the most popular holsters ever designed. S&W's Model 21 Blazer handles all popular and double action sporting revolvers and automatics with 2" to 8 3/8" barrels. The Blazer has burnished and waxed edges, a trigger guard welt and a snap-on loop for belts up to 3" wide. And it's available in plain black or russet leather.

Model 22

S&W's Model 22 Lined Holster is premium quality, fully lined model with a built-in sight protector and a single retaining strap. The Model 22 will accommodate revolvers and automatics in all frame sizes with barrels from 2" to 8 3/8" in length. It's available in black or russet, plain or basket weave. Model 22 holsters for guns with barrels 4" or longer have a 2 1/4" belt loop, and a 1 3/4" belt loop for guns with barrels under 4" in length.

Model 27 Sportsman

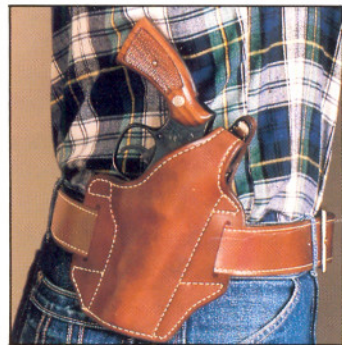

The Sportsman Holster is a dressy, close fitting, high-ride holster. Crafted from prefinished brown leather and lined in soft brown suede, this holster is available in two versions. One accommodates most popular large and medium frame revolvers, the other is designed for medium frame automatics like the Smith & Wesson Model 439 or 459.

Model 29 and 29L Slimline

If you're looking for a high-quality holster that really stays tight and snug against your body, look no further. The Model 29L

Slimline is lined with a soft brown suede that cushions and protects

your gun. Meticulously stitched and molded, the Slimline has belt loops for 1 3/4" belts, a wide thumb break strap and rides high in the favored "FBI" tilt. Available in prefinished brown leather or dip-dyed black leather for 2" to 4" small or medium frame revolvers. Model 29 is the unlined version of the 29L and is identical to it in every specification except for the suede lining.

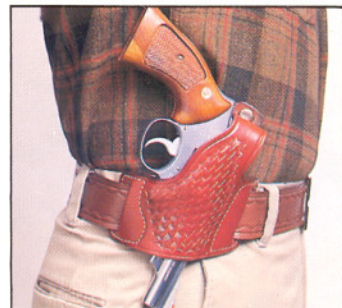

Model 38 Auto Belt Strap

Here's a close riding, rugged holster for automatics with up to a 5" barrel. Molded to fit the gun, it provides maximum concealment in a minimum space, yet covers the trigger for safety. The 38 is available in black or russet and has loops for a 1 3/4" belt.

Model 39 Revolver Belt Strap

A popular design, this S&W belt strap holster is one of the most comfortable, close fitting

ever developed. The Model 39 features a snug, molded fit and a thumb break. It accommodates small and medium frame revolvers, fits 1 $\frac{3}{4}$ " belts and is available in black or brown, plain or basket weave.

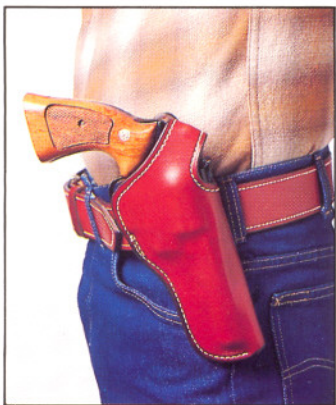

Model 44 Hugger

This flat, snug-fitting holster is designed for small and medium frame revolvers and S&W 9mm automatics. Features include a trigger guard, wide thumb release strap and rides high and close in the "FBI" tilt. Available in black or russet, plain or basket weave to fit 1 $\frac{3}{4}$ " belts.

Model 170 Cross Draw

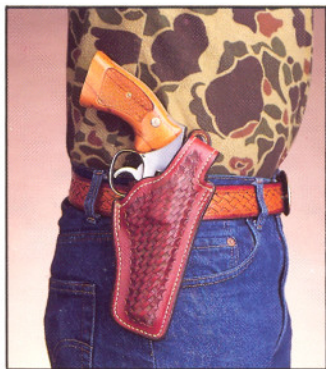

Shooters have been asking for a cross draw holster . . . and, in the Model 170, S&W has

answered their needs. The Model 170 has the reverse tilt that makes a cross draw fast and easy, a popular paddle thumb break and a closed muzzle. It accommodates small and medium frame revolvers and S&W 9mm autos. The Model 170 cross draw holster is available in brown, with brown suede lining, to fit 1 $\frac{3}{4}$ " belts.

Model 504

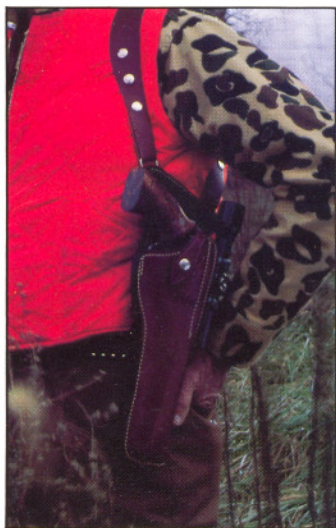

Here's an innovative, good looking, high ride design with today's most wanted features. Silicone treated brown suede lining. Double welt construction. Thumb break. Closed muzzle. The Model 504 is available in brown or black, plain or basketweave for small, medium and large frame revolvers, has 2 $\frac{1}{4}$ " belt loops for guns with 4" or longer barrels, 1 $\frac{3}{4}$ " loops for shorter barrels.

SHOULDER HOLSTERS

Model 10 Hunting

S&W's Model 10 shoulder holster has been designed and crafted with the handgun hunter in mind. It's ruggedly built, with a comfortable adjustable harness, a retention strap and is fully lined in brown suede. The Model 10 accommodates 6" to 8 $\frac{3}{8}$ " barrel medium and large frame revolvers; is available in brown, right hand only. *Model 10S* is cut to accommodate scoped handguns suede lining, to fit 1 $\frac{3}{4}$ " belts.

Model 15

This new, contemporary shoulder holster is fully suede lined and features a cylinder cutout for stylish appearance. The Model 15's rich, prefinished brown leather matches the harness strap. With a fully elasticized back strap for maximum comfort, the Model 15, in prefinished brown only, accommodates medium and large frame revolvers with 4" to 6" barrels.

Model 23

A clean, simple, functional design, the Model 23 shoulder holster provides a perfect balance of comfort and concealment. A tension screw assures proper fit of the holster to the gun and the Model 23 has full grip clearance, an adjustable belt strap and adjustable harness. Available in russet to fit revolvers with 2" to 4" barrels.

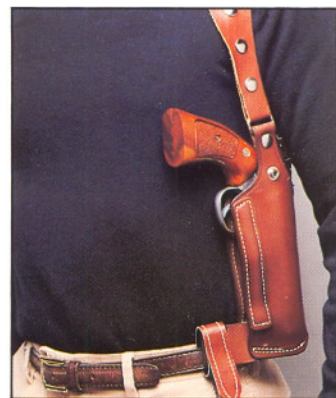

Model 31 Horizontal Shoulder Holster

This innovatively designed holster rides high and close for maximum concealment and comfort. The Model 31 allows you to carry your handgun in a horizontal position for a natural, easy draw. Available in brown, the Model 31 has a leather harness and a fully elasticized back strap.

Models 43 and 45

This popular holster features a fast draw, breakout spring tension design. No metal parts are exposed to the gun. A glove leather shoulder strap and elasticized harness adjust to the

wearer's body for maximum comfort. An offset belt strap pulls the gun close to the body. There's a removable belt strap on the opposite side and an adjustable hammer strap for added security. In brown, it handles small, medium and large frame revolvers with barrels from 2" to 6 $\frac{1}{2}$ " and large frame automatics.

Model 45 is a fully suede-lined version of the Model 43.

ANKLE HOLSTER

Model B20

One of the most comfortable ankle holsters on the market, S&W's B20 features a suede like lining and protective area behind the cylinder to protect the leg from chafing. The popular thumb break insures a fast, easy draw. The B20 accommodates S&W's Bodyguard® models as well as other small frame revolvers and automatics. Quick, easy Velcro fasteners allow easy adjustment for perfect fit.

BELTS

Model 102 Rifle Sling

A truly unique design, this basket weave belt resembles a military rifle sling. Fashioned from heavy leather, the Model 102 is graced by highly polished brass fittings. Available in brown basket weave, the Model 102 rifle sling belt is available in sizes from 22" through 46".

Model 112 Blazer Cartridge

Tailored to be the perfect mate for a Model 21 Blazer holster, this fine belt was created to meet the demand for a less expensive 1 3/4" cartridge belt. Model 112 has 20 raised loops for .22, .38,

.357 Magnum or .44 Magnum ammunition. It's available in black or russet, plain or basket weave, in sizes to fit waists from 28" to 50".

Model 114 Unlined Dress

Fashioned from heavy, top grain cowhide, the Model 114 unlined dress belt is 1 3/4" wide, it's available in russet, either plain or basket weave, in a full range of waist sizes.

Model 117

The Model 117 dress belt was created to complement Smith & Wesson's smaller commemorative buckles like the .357 Magnum. A distinctive decorative design adds to the rugged good looks of this 1 1/2" wide belt. The Model 117 is available in brown in a full range of waist sizes.

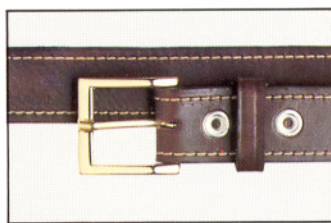

Model 119

A 1 3/4" wide version of S&W's popular Model 117 dress belt, the Model 119 is designed to be worn with our larger commemorative buckles like "The Hostiles." It's the same as the Model 117 in all other details.

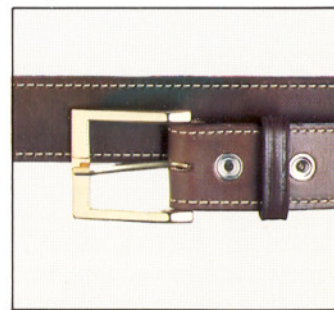

Model 131

This unlined dress belt is a rugged, good looking, unlined dress belt with the left to keep the Slimline (or any other holster) tight to your body. It's just 1 1/2" wide to fit those new narrow trouser belt loops. Model 131 is available in prefinished brown or black leather in sizes to fit waists from 28" to 50".

Model 132

This lined belt is a smartly styled and beautifully detailed dress belt that's fully lined with brown suede. Crafted from Smith & Wesson's prefinished brown leather, Model 132 matches the new Slimline and Sportsman holsters. It's 1 3/4" wide, really keeps a holster snug against the body. And it's available in a full range of waist sizes.

SLINGS

Smith & Wesson offers a line of six slings to meet every need and preference. Fashioned from heavy grade, top grain cowhide, these slings have brass fittings and all but the military-type sling are backed by natural suede leather. All fit one-inch or larger swivels.

A. Model 202 Diamond Stitch

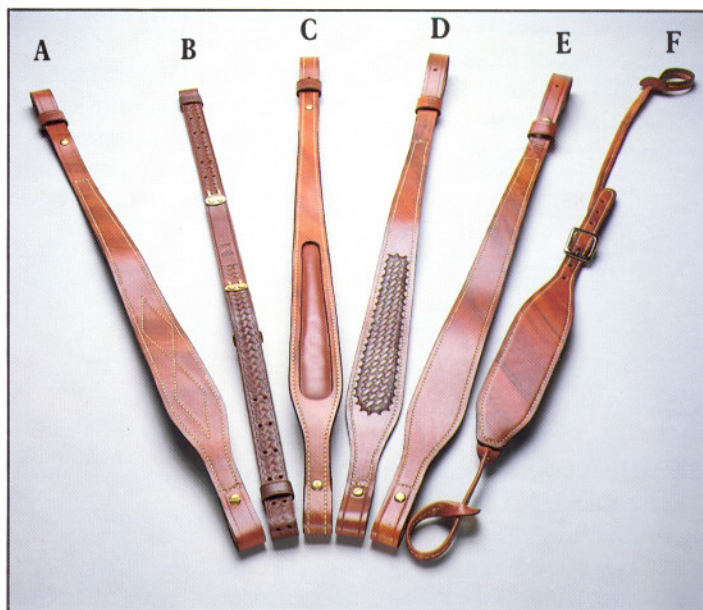

B. Model 90 Military-type

C. Model 203 Padded

D. Model 201 Weave

E. Model 200 Plain

F. Model 204 Shotgun

Model 93 Holster Cross Strap

Designed especially for use with S&W Model 10 shoulder holster, the Model 93 leather cross strap provides a bonus in comfort and maneuverability. Fully adjustable, the Model 93 is available in prefinished brown leather and comes with an extra wide shoulder pad for added comfort.

Model 97 Rifle Cartridge Case

Molded from thick, top grain cowhide, the Model 97 will accommodate an insert with 20 rounds of your favorite cartridges. Thick belt loops are riveted to the body of the case for extra strength and durability. Model 97 is available in plain russet.

Model 133/134 Double Clip Pouch

The Model 133 Double Clip Pouch has been specially designed for use with the Model 27 Sportsman Auto Holster. Ruggedly fashioned from our prefinished brown leather, the Model 133 accommodates S&W

Model 39 or Browning 9mm clips. Model 134 Double Clip Pouch, identical to the Model 133, is designed to accommodate Colt 45 clips.

Model 137 Cartridge Carrier

A perfect companion to the new Slimline holster and dress belt, the Model 137 Cartridge Carrier is available in S&W prefinished brown or black leather. The snap-on Model 137 holds six .38 or .357 Magnum rounds.

Model 138 Cartridge Carrier

The Model 138 Cartridge Carrier holds 12 rounds of .38, .357 Magnum or .44 Magnum ammunition. A raised loop design, the Model 138 is constructed so the belt passes completely through the entire length of the carrier body to insure a snug, wobble-free fit. It will take up to a 1 3/4" belt and is available in prefinished brown only.

WESSONHIDE

The rising cost of top quality leather hides has created a demand for a less expensive alternative. Smith & Wesson has met this demand with Wessonhide,™ a

unique, tough, durable, synthetic material that's maintenance-free, requires no oiling, dyeing or drying. Impervious to heat, cold or moisture, Wessonhide has the look and feel of real leather and is ideal for use in adverse environmental conditions.

Model 19 Pioneer Holster

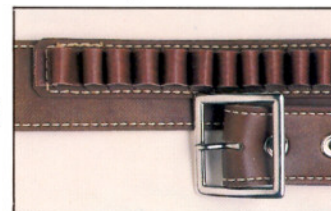

The Pioneer Holster is made to the same pattern as the popular Blazer model. Stitched with wear resistant Dacron polyester thread

the Wessonhide Pioneer holster has a full leather welt that gives it the smell of real leather. Its snap-on loop fits belts up to 3" wide. There's a Pioneer holster for virtually every popular handgun on the market today in barrel lengths from 2" to 8 3/8". And the Model 19 is available in your choice of russet or black.

Model 143 Pioneer Cartridge Belt

The Pioneer Cartridge Belt is a rugged, handsomely styled companion for the Model 19 Pioneer holster. Fully lined, the Model 143 tapers from 2" to 1 3/4" at the end opposite the buckle and has 20 loops for .22, .38, .357 Magnum, .44 Magnum or .45 caliber cartridges. The Pioneer Cartridge Belt is available in russet or black in a full range of sizes.

Model 144 The Cobra Strap

Here's S&W's popularly styled and detailed rifle carrying strap in rugged Wessonhide. A full, suede-like lining provides a positive non-slip surface for carrying comfort. Model 144 is available in russet finish.

Model 145, The Rifle Sling

This tough, durable 1" wide sling will look good on any gun. Its simple design makes two-position adjustment easy. The Model 145 is available in russet finish.

BUCKLES

Smith & Wesson buckles feature unique, beautifully detailed designs die struck in solid brass. Where two model numbers are given for a design, the first indicates brass finish, the second indicates antique silver. Model 679 is antique silver only.

Model 660 The Symbol of Quality

Models 670/671, The Pistol Case

Model 675, The Horse Thief

Models 677/678, American Traditions

Model 679, The .44 Magnum

Models 680/681, Brown Bear

Model 683, White Tail Deer

THE SCOUT LINE

Here's a new line of holsters and accessories that are so light-weight you hardly know you're wearing them. Yet so comfortable, you know they're from Smith & Wesson.

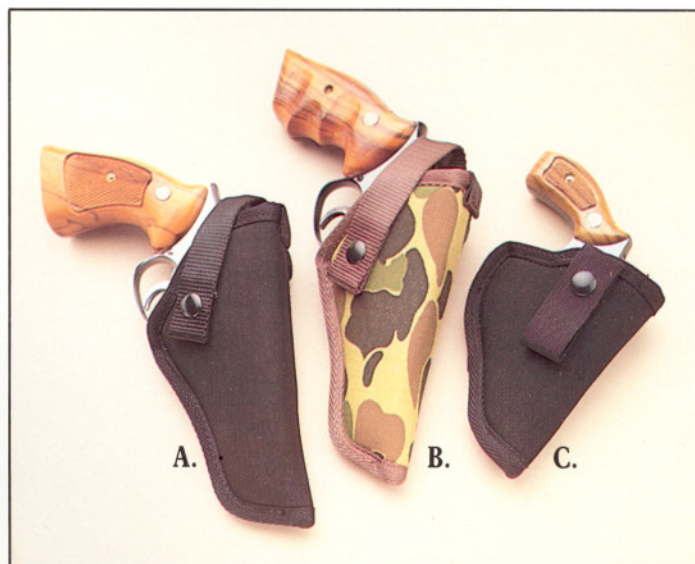

The new Scout line is crafted from Cordura® nylon for strength, durability and ease of care. Each holster is fully lined and padded with foam to protect the gun's finish and has a reinforced insert to protect the sights. The muzzle end is closed to protect the barrel, yet special stitching allows moisture to drain out of the holster.

Shoulder holsters have padded shoulder straps, fully elasticized harnesses and both holster and opposite side tiedowns.
